### Salzer's California Giant Asters HA

This marvelous type is the finest Aster in cultivation today, and commands the highest price at the cut-flower markets of all of our large cities. No less, does it make the best display of any Aster in the garden.

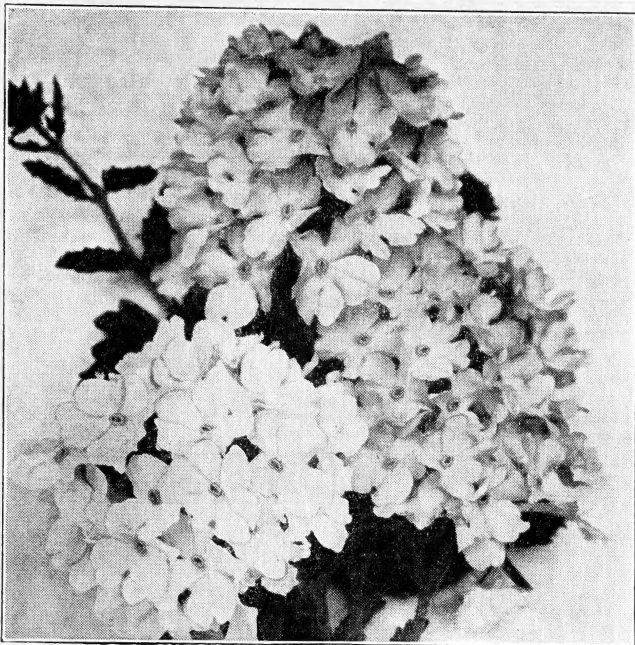

It is a cross between the Beauty Type of Aster and the Crego Aster, combining the vigorous tall growth of the former with the lovely, double, large flower of the latter. Salzer's California Giant is practically non-lateral, but instead, carries its blooms at the end of its long stems, without the small side branches, producing enormous flowers of wonderful substance on strong, stiff stems 20 to 24 inches long. The flowers measure 5 to 6 inches in diameter, with long petals that fluffily curl across each other and produce an exquisite bloom that has no equal.

Wherever exhibited, this superb Aster has won prizes and received awards of merit. Mrs. E. Meyers, 3418 E 126th St., Cleveland O., writes: "Your California Giant Asters last year were the most beautiful Asters I have ever had!" Mrs. Lillian B. Ton Eyck, R. D. 1, Box 165, Sandy, Ore., writes: "We have beautiful bouquets galore from your California Giant Asters." Miss Valeria Kielas, Comfrey, Minn., writes: "Your California Giant Asters were just beautiful!"

SALZER BUILDINGS

January 2, 1942

Dear Friends:

I wonder how many of us realize that America is the best fed country in the world. We in the United States have an abundance of all of the different foods that are needful for good health, enjoying all of the many different fresh vegetables and greens that are denied the citizens of other lands. Have you ever thought how much you could enjoy your daily life, if your menus day after day consisted mainly of potatoes, or rice, or rutabagas, or black bread, or curdled milk? All of these are good, they sustain life, but we in America enjoy them by choice and do not eat them of necessity. We in America are blessed with a wider variety of vitamin rich foods than any other nation in the world.

Mother Earth and Guns Will Maintain Democracy! Food will be our mainstay. Let us not neglect the bounties of the good earth, literally and figuratively laying at our very doorsteps. Plant some vegetables this year in your back yard, which may have been a landscaped lawn for several years. Necessity and duty are both calling every citizen of America.

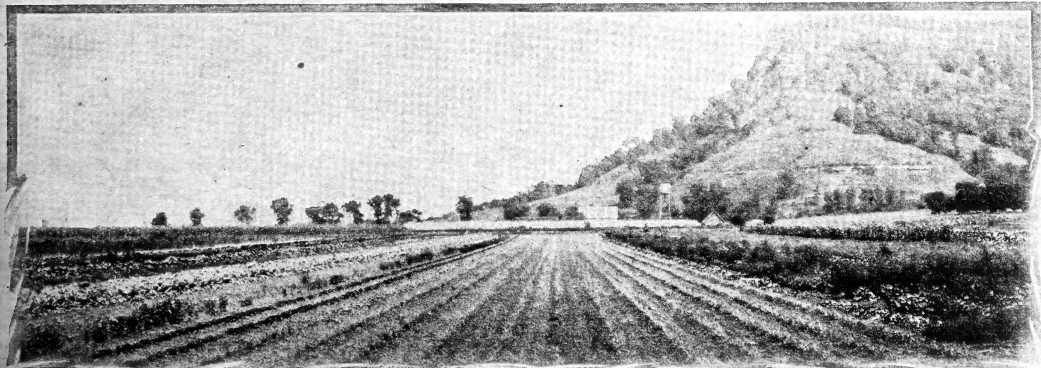

We offer only one word of advice. Purchase clean, pure seeds and order them early. Some seeds are exceptionally short, due to excessive rains during the growing season, and later on, may be actually unobtainable.

Cordially yours,

*Kenneth E. Salzer*  
President

Very tender, brittle, of fine texture and quality, and is the very earliest wax-podded bean. It is a bountiful yielder and bears for a long season; it is practically rustproof and it thrives and yields heavily in either a rainy season or in dry, hot weather. Appears to be absolutely unaffected by bad weather. Ready to pick in 35 days. If you have not as yet tried our New Early Wonder Wax, by all means give it a trial this season. You will not be sorry.

# GIANT BUSH LIMA

For Size and Flavor Has No Rival

Enormously productive and bears pods of immense size. Plants are of vigorous growth, with heavy foliage, and of true bush form, the full grown bushes measuring 30 inches in height and 24 inches across the top. Pods are frequently borne in "clusters" of from 5 to 8, are 5 to 6 inches long by 1 1/4 inches wide, and each one is well filled with large, thick, tender, full-size beans of melting and luscious flavor. It is very early, maturing in about 85 days. A universal favorite, because of its earliness, productiveness, size and fine flavor. Lima Beans should not be planted before the soil has warmed up and the weather is quite settled.

## SMALL BUSH OR SIEVA

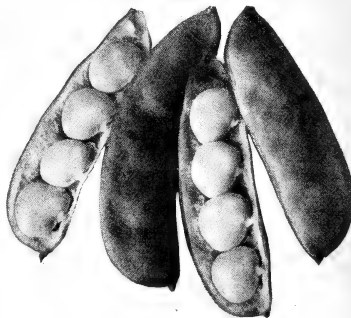

Is the smallest but most prolific of all the white seeded varieties, and as they are hardy and very early, are worth growing in the North. Matures in 70 to 78 days. Of true bush growth, the plants bear a tremendous lot of pods 3 inches long and filled with 3 or 4 light green, small, flat beans, of a sweet and delicious flavor. When mature, the beans are white, and keep well for winter shell beans.

## EDIBLE SOY BEANS

**EDIBLE SOY BEANS** are the food of the future! The tremendous food value of soy beans has long been known but the difficulty has been to develop a variety that would cook and bake soft so as to be edible.

The original seed was brought to the U. S. by Mr. Morse of the U. S. Dept. of Agriculture and was bred up and developed by Prof. Geo. M. Briggs of the University of Wisconsin and his associates. Matures in 85 days. Soy Beans are a substitute for meat; when green they are as good as fresh peas; cooked or baked, they taste somewhat like navy beans; roasted, they taste like peanuts. And they are of untold value for diabetics since they are low in starch!

The seed we offer may also be used for immediate table consumption! They will cook or bake deliciously soft, using your navy bean recipes. Price: 43 1/2—2 Oz. Pkg., 10c; 2 pkgs., 17c; 1/2 lb., 23c; 1 lb., 39c; 2 lbs., 67c; 5 lbs., \$1.45, postpaid.

### SALZER'S RED BEAUTY

See Color Illustration, Front Cover

Very early, uniform in size, perfect turnip shape, fine grained, tender, the richest and darkest red of any beet. Salzer's Red Beauty is a mighty good beet to plant and those who have once planted it, see to it that they have some of this fine strain in their garden every year. Its uniformity and its rich, attractive, dark red color sell the beets on sight at market, and for the home garden it not only produces tender, delicious, extremely early beets for table use, but the color is retained when cooked, making them most attractive for both canning and pickling.

Remarkable for its uniform, perfect shape; roots are always smooth, with but a small tap-root, are of medium size, flesh is finely grained, very sweet, always free from woody fibres, and the skin and flesh are the darkest red of any beet. The leaves are dark green and shaded with red, are very small and of upright growth, allowing close planting. A heavy cropper, maturing in about 40 days. 166—Pkg., 15c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.45; lb., \$2.75, postpaid.

### DETROIT DARK RED

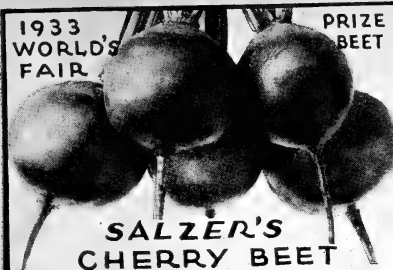

Cannot be surpassed for main crop purposes. One of the largest beets grown and a heavy cropper, producing large, globe shaped roots, delicious, tender, and fine grained, small tap-root, and free from any trace of woodiness or stringy tendency. Succeeds equally well at all seasons and is one of the best to sow in spring to succeed the extra early and medium crop sorts.

The skin is an attractive blood-red and the flesh is dark red, practically zoneless. It is a popular variety for canning retaining its fine color exceptionally well. Leaves are dark green, shaded with red, tops are small and grow upright. The flesh is solid, always tender and of a decidedly sweet flavor. Matures in about 50 days. Most valuable for succession sowings. A great favorite, not only with market gardeners who grow for profit, but likewise with the home gardener. BEET

## SALZER'S CHERRY BEET

We first offered Salzer's Cherry Beet in 1933, the memorable Chicago World's Fair year, as the Unknown Beet, and thousands planted it, to find it one of the nicest beets grown! **Salzer's Cherry Beet** is a small, early beet, maturing in 52 days and is especially fine for canning and pickling whole at  $1\frac{1}{4}$  to  $1\frac{1}{2}$  inches in diameter. Roots are smooth, even in size and shape and almost perfectly globular. Tops and tap roots are very small. The flesh is an intense deep crimson, free from white zones, elegant in quality.

Yields heavily. While it is a splendid beet for canning, its attractive color and small uniform size make it ideal for daily table use. The flesh is so fine grained, so sweet and tasty, that it almost sets a new standard for beet quality! Fine for both home and market. 160—Pkg., 10c; oz., 24c; 2 oz., 42c;  $\frac{1}{4}$  lb., 72c;  $\frac{1}{2}$  lb., \$1.35; lb., \$2.50, postpaid.

## CROSBY'S EGYPTIAN

One of the most extensively grown of any variety of beets, by market gardeners. It is noted for its handsome form, small tops, very small tap-root, fine quality and quick, rapid growth. Roots

run uniform in size and shape, are rather flattened, turnip shaped, reach a good size, are tender and crisp. Flesh is an attractive dark red color with slightly lighter red zonings. Especially desirable for bunching for the early market. Takes on its turnip shape very early. Matures in 45 days. Also fine for the home gardener. We specialize in beet seed and we don't believe any better strains can be purchased.

158—Pkg., 7c; oz., 22c;  $\frac{1}{4}$  lb., 65c;  $\frac{1}{2}$  lb., \$1.17; lb., \$2.15, postpaid.

## SALZER'S EARLY WONDER BEETS

Its beautiful deep blood-red color, nearly globe-shaped root with almost no lighter zoning in the cross-section of the root, its small sized top and its smooth, clean, and small tap-root makes it a decided asset in the beet family. Matures evenly so that the entire crop may be gathered at one time. It is a very rapid grower, is very quickly in presentable market shape and because of its early maturity, it can be sown outside as late as July. Matures in 44 days.

177—Pkg., 5c; oz., 20c;  $\frac{1}{4}$  lb., 64c;  $\frac{1}{2}$  lb., \$1.15; lb., \$2.10, postpaid.

## SWISS CHARD OR SPINACH BEET

The leaves grow large and upright and as the outer leaves are cut, more come from the center. Yields a constant crop from July until winter, and can be used all summer when spinach is not available. The mid-rib or center stem of each leaf is large, broad, and white, and after trimming can be cooked and served like asparagus. The leaf part is cooked like spinach.

## SALZER'S LIGHTNING

Salzer's Lightning Cabbage is an extremely early cabbage, very valuable for the home garden, for the market gardener, and for shipping. The handsome heads are conical or pointed, and are usually about 8 inches long, about 6 inches thick near the base, and are firm and solid. The heads average 2½ pounds in weight, which is remarkable when one considers its earliness.

First introduced by us in 1889, Salzer's Lightning was pronounced by one and all the greatest addition for the past FIFTY YEARS to the cabbage family. Produces fine sized, marketable heads in 75 DAYS FROM SOWING OF THE SEED. Thousands of gardeners are now depending on our Lightning for their first early crop. It is very hardy, always sure to head and almost always the earliest in the market. The heads are blanched. The few outer leaves, can therefore be planted closely together and yield a large crop per acre.

**OUR LIGHTNING** is often ripe and solid when other sorts are still in leaves. We consider it without an equal in earliness, richness and deliciousness of flavor. No vegetable pays better than early cabbage. If you are a market gardener, you will want this; if you have a city garden, you cannot get along without it. If you wish the EARLIEST CABBAGE in the world, you must plant **SALZER'S LIGHTNING**.  
 2½ lb.—Pkg., 15c; ½ oz., 24c; 2 oz., 39c; ¼ lb., \$1.29, ½ lb., \$2.35; 1 lb., \$4.50, postpaid.

# Frost Proof Cabbage Plants

Withstand Frosts and Slight Freezes  
They Require no Protection

**Frost Proof**—That is exactly what we mean, in fact, we claim more than that. If the plants do not withstand twelve degrees below freezing (20 degrees above zero) we will either replace them or refund your money. Nor is that all, you can plant Salzer's Frost Proof Plants out in the open just as soon as you can get them in the soil no matter if you do expect one or more killing frosts afterwards, even if it is four to six weeks earlier than you usually get out home grown plants. Once in the soil the heads freeze in the soil, or the plants being covered with ice, snow or if it does no injury, unless the temperature gets below 20 degrees above zero (frequently not then).

If plants cannot be set out the same day received, enclose immediately, dip roots in water and heel out into the ground, spreading bunches a little apart. Place in crate or package.

## SPECIAL NOTICE

The plants when received may be somewhat wilted and have a stunted appearance, which may be disappointing. Regardless of appearance, they will produce superior results.

Be sure to state when we shall send your Cabbage Plants. Shipping weight 10 to 20 lbs. per 1000 plants. Plants are shipped direct from our growing place. Available from January 15 to June 15. We cannot accept orders for 25 plants of one variety. No orders filled C. O. D.

# SALZER'S GIANT FLAT DUTCH

## The Grandest, Best Keeping, Surest Heading, Large Cabbage in the World

For almost half a century this grand cabbage has held absolute sway as the undisputed leader of all late flat cabbages. So famous and well-known has it become, that it is not an uncommon occurrence for stores to give the preference to market gardeners who can furnish them with these large, solid, heavy cabbages. It is surprising how many of the retail customers insist upon purchasing only Salzer's Giant Flat Dutch Cabbages for their winter use. They know that its flavor, quality, and tenderness is unequalled by any other variety.

### Always In Great Demand

On the city markets, the attractive, fine appearing heads sell themselves to thrifty purchasers. The home gardener who once plants this superb variety, finds it so far superior in every respect to any other late sort that he has ever tried, that where Salzer's Giant Flat Dutch has once gotten a foot-hold in a garden, it has never been superseded by other varieties, but is sown year after year. Unsurpassed in quality and taste, sureness of heading, weight, size, attractiveness, far superior for sauerkraut and slaw. Once planted, always planted. Pronounced everywhere to be the greatest late flat cabbage ever introduced, and the finest of any in existence.

### A Sure Header

For sureness in heading and regularity in growth, SALZER'S GIANT FLAT DUTCH certainly heads the list. Heads are 12 to 14 inches in diameter, averaging 18 to 20 pounds in weight. It forms every time, very large, very hard, solid heads, crisp, tender, sweet, uniform in shape, color and handsome appearance. It has a very short stem, is a very compact grower, forms few loose leaves, which

turn into the head and if planted closely will yield enormous crops. Reports of 999 marketable heads from 1,000 plants set out are of frequent occurrence. It keeps well until late in Spring and is good for shipping.

# Salzer's Earliest Coreless Carrot

A PRIZE WINNER

EARLIEST  
CORELESS**

**The Earliest,  
Sweetest,  
Most Tender,  
and  
Only Really  
Coreless Carrot  
Grown**

The peer of all carrots—the grandest carrot in cultivation! Market Gardeners, if you want highest, top-notch prices, you must plant Salzer's Earliest Coreless Carrot. Home Gardeners, if you want to have carrots that will be a real treat for your own table use, carrots that you will take pride in showing to your neighbor, you must plant Salzer's Earliest Coreless. A carrot that we think is in a class all by itself, and has been ever since it was introduced by us over forty years ago.

As in all else, Salzer's Earliest Coreless Carrot reigns supreme in the carrot world. Those who once plant it never discard this incomparable strain. Those who have never planted it, are missing a real treat. Our Earliest Coreless will demonstrate what splendid flavor, what tenderness, what attractive color, what lusciousness, what symmetry, can be bred into carrots. When planting seeds, the best is none too good. It is the cheapest in the end as everyone knows, and whenever you go out in the garden to get some carrots for dinner, you will be mighty glad that you planted Salzer's Earliest Coreless this spring.

It is a beautiful variety. It is exceptionally uniform in shape, of fine texture and entirely free of any heart and is very early, maturing about a week ahead of all other half long sorts, although fully as productive as any of them, the roots usually measuring 6 to 7 inches in length and 1½ inches through.

Salzer's Earliest Coreless in shape and color is one of the most handsome of Carrots. The roots are of cylindrical form, blunt at the end, very symmetrical, smooth skin, fine neck and small top. The color is a beautiful red, brighter and deeper than that of any other Carrot. It is a color that will draw the attention of the buyer on the market.

But the greatest feature of this fine variety is the entire absence of the stringy, coarse heart or core found in so many Carrots. It is of most delicious quality and owing to the fine texture of the red flesh and its tender, delicate flavor, Salzer's Earliest Coreless is called the sweetest of all Carrots by all those who have tasted it.

# Cauliflower

## SALZER'S SUPER SNOWBALL

A superior strain, well named as Super, of Salzer's Early Snowball Cauliflower, about 5 days later but having a larger and heavier head. The immense heads have smooth, solid, snow white curds very compact and of best quality, and the crop matures nearly all at one time. Salzer's Super Snowball surpasses all others in heaviness and uniformity of maturity and is ideal for forcing under glass. Unequalled for either the home gardener or the critical market gardener.

325—Pkg., 25c; ¼ oz., 69c; ½ oz., \$1.19; 1 oz., \$2.20; 2 oz., \$4.25; 2 oz., \$8.15, postpaid.

## SALZER'S EARLY SNOWBALL

Extremely popular in all sections of the country. For planting at all seasons, and as an all purpose cauliflower it is unsurpassed.

Matures in about 97 days, producing uniform heads of large size, handsome form, and exquisite quality, which are good sellers in every market. Salzer's Early Snowball is the standard variety by which all other sorts are judged. The heads are smooth, solid, snowy white, with compact curds of excellent flavor and quality.

## SALZER'S EARLIEST SUREHEAD

IT HEADS WHERE OTHERS  
FAIL

Grandest of all! Whether for forcing or open ground, planted early or late, it is the best, surest header of all. It is particularly desirable for forcing under glass. On our trial grounds every plant produced a **SUPERB HEAD AND SURPASSED ALL OTHER VARIETIES OF EQUAL SIZE IN EARLINESS AND QUALITY.**

The plants are of strong growth with erect, dark green, pointed leaves growing closely about the heads which are pure snowy white, with very close and compact curds of wonderfully fine quality. The heads are of large size, often reaching 10 inches or more in diameter.

This sureness of heading is highly essential to the market gardener and just as necessary for the home gardener. To make the best heads, cauliflower plants need cool, moist weather, good soil and thorough cultivation. Salzer's Earliest Surehead matures in about 95 days and is a sure header.

317—Pkg., 20c; ¼ oz., 95c; ½ oz., \$1.84; 1 oz., \$3.50; 2 oz., \$6.65, postpaid.

328—Earliest Surehead Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain: Pkg., 25c; ¼ oz., \$1.10; ½ oz., \$2.10; 1 oz., \$3.95; 2 oz., \$7.35, postpaid.

## SALZER'S FIRST CROP

A grand, distinct, extremely early variety. A splendid market gardener's variety, with stone-hard, snow-white heads.

Being of dwarf, compact growth, with but a small number of leaves, it is an ideal cauliflower for forcing during winter and spring. Severe tests have proved it absolutely certain to head when conditions are ordinarily favorable, and also most uniform in growth, type and maturity, the crops being taken off almost clean at the first cutting. One characteristic of this novelty is the close sitting together of the leaves, enfolding the head tightly and causing the inner leaves to avoid the necessity of the necessity of tying up.

The heads are very beautiful, solid, snow white, of medium size, which will find a ready sale at the highest prices everywhere and will never fail to be appreciated.

321—Pkg., 12c; ¼ oz., 77c; ½ oz., \$1.42; 1 oz., \$2.75; 2 oz., \$5.25, postpaid.

## DRY WEATHER OR DANISH GIANT

Produces stone-hard and snow-white heads, unsurpassed in quality, which average larger than those of the Salzer's Surehead, but are a week later. The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. As indicated by the name, for dry, hot climates it is to be preferred to all other sorts, being a sure header there when other sorts fail. Even in the driest weather, it is of a vigorous growth.

316—Pkg., 20c; ¼ oz., 98c; ½ oz., \$1.84; 1 oz., \$3.50; 2 oz., \$6.65, postpaid.

## EARLY PARIS

Extremely early, dwarf, having fine white heads, solid and compact curds. Quality is good. This variety is a real bargain and remains in demand with our customers. 318—Pkg., 15c; ¼ oz., 81c; ½ oz., \$1.59; 1 oz., \$2.95; 2 oz., \$5.65, postpaid. 326—Early Paris, Salzer's Cliffwood Farm, TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 20c; ¼ oz., 92c; ½ oz., \$1.69; 1 oz., \$3.25; 2 oz., \$6.15, postpaid.

# CELERY

## SALZER'S WONDERFUL

Salzer's  
Wonderful

Also called Golden Plume! Earliest in maturity, superior eating quality, increased size, beautiful golden color, superior keeping qualities, marked resistance to rust and blight,—these are the outstanding characteristics of this superb celery.

Salzer's Wonderful produces fine stocky plants with large, broad, thick stalks that blanch easily and quickly to a beautiful clear waxen yellow. They are solid, crisp, brittle, tender, of a much superior flavor and quality, and are entirely free from stringiness of any kind. Trials at Cliffwood Farms prove it to be the very earliest celery. This extra earliness spells top prices for the trucker, and the earliest, most delicious, crisp and beautiful celery for the home gardener's table use.

The plants are remarkably resistant to blight and rust, a factor of great importance.

345—Pkg., 10c; ½ oz., 25c; oz., 40c; 2 oz., 72c; ¼ lb., \$1.25, postpaid.

347—Salzer's Wonderful, Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 15c; ½ oz., 30c; oz., 49c; 2 oz., 88c; ¼ lb., \$1.55, postpaid.

### GOLDEN SELF-BLANCHING

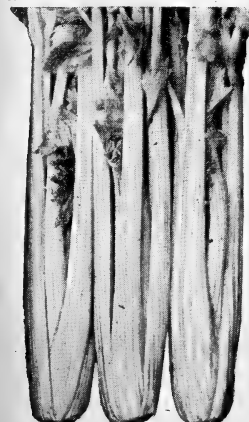

The ribs are thick, broad, fleshy and the hearts large and solid. As the plants mature, the inner stems and leaves turn to a beautiful golden yellow. Blanches easily, quickly, and perfectly.

It is planted very extensively and owing to its handsome, waxen-yellow color, its superb quality, entire freedom from stringiness, crispness and tenderness and its delightful, rich nutty flavor, this variety is very popular and one of the leading varieties in many markets.

333—Pkg., 10c; oz., 37c; 2 oz., 69c; ¼ lb., \$1.15; ½ lb., \$2.15; lb., \$4.15, postpaid.

### SELECT WHITE PLUME

Winter Queen

### WINTER QUEEN

The standard variety for winter keeping. It is the finest dwarf winter celery that we have ever grown on Cliffwood Farms. The plants are large, of close habit and compact growth. Stalks are very large, broad, solid, crisp, tender and of a delicious flavor. Blanches easily to a beautiful creamy white. Splendid keeper. 343—Pkg., 10c; oz., 33c; 2 oz., 58c; ¼ lb., 98c; ½ lb., \$1.85; lb., \$3.50, postpaid.

### GIANT PASCAL WINTER CELERY

### SALZER'S SELF BLANCHER

Thick, Heavy Stalks, Silvery White

Salzer's Self-Blancher has been bred from the White Plume, over which it is a great improvement. It blanches more readily, is earlier, grows more stalks, is heavier and is a much better keeper than the older variety.

Next to Salzer's Wonderful it is the earliest celery than can be grown. It is of compact habit, with light green foliage, stalks are thick and solid, unusually meaty, of a delicious rich flavor, pure white, heavy, tender and crisp. As it keeps so well, it is widely grown for winter use. 334—Pkg., 10c; oz., 30c; 2 oz., 52c; ¼ lb., 92c; ½ lb., \$1.70; lb., \$3.25, postpaid.

### UTAH SPECIAL The Best Green Celery

Also known as Salt Lake and Utah Winter Celery. The stalks are large and the heart is well developed, with practically no soft stalks, which is unusual with green celery. Salzer's Utah Special blanches quickly to a beautiful pure white, very crisp, brittle, and is of a rich nutty, superior quality. It keeps very well and we highly recommend it for winter use; it is very solid and very free from strings. 346—Pkg., 10c; oz., 35c; 2 oz., 62c; ¼ lb., \$1.00; ½ lb., \$1.95; lb., \$3.75, postpaid.

### TURNIP ROOTED CELERY OR CELERICAC

Salzer's Golden Independence

## SALZER'S GOLDEN INDEPENDENCE OR GOLDEN 4TH OF JULY

60 days. Offered for the first time on Salzer's Seventieth Anniversary in 1938. Has all of the good qualities and the exceptional earliness of Salzer's Independence White Sweet Corn, famous the country over, except that the big, luscious, and deep kernalled ears are a beautiful golden yellow color. Not wilt resistant. If you have never planted Salzer's Golden Independence, be sure to give it a trial this year.

375—2 Oz. Pkg., 15c; 2 pkgs., 23c; ½ lb., 28c; 1 lb., 39c; 2 lbs., 65c; 5 lbs., \$1.43, postpaid.

## TOP CROSS GOLDEN BANTAM

79 days. This variety was produced by crossing Purdue Cross Golden Bantam with our Golden Bantam and is more wilt resistant than Purdue Cross. Ears average 7 to 7½ inches, 8 to 12 rowed, short pointed, with golden yellow kernels of excellent quality. Stalks are about 5½ to 6 feet high. Also called Bancross.

Salzer's Top Cross Golden Bantam yields heavily and because of the heavy yields, many are planting this and Purdue Cross in sections where Stewart's Wilt is not prevalent. 409—2 Oz. Pkg., 15c; 2 pkgs., 25c; ½ lb., 32c; 1 lb., 55c; 2 lbs., 85c; 5 lbs., \$1.85, postpaid.

## PURDUE CROSS GOLDEN BANTAM

76 days. Resistant to Stewart's Wilt! During the past few years, sweet corn growers have suffered enormously heavy losses from Stewart's Disease or Wilt. The only remedy is disease-resistant seed and Purdue Cross Golden Bantam has been giving remarkably large yields on badly infected soil! Was developed by Prof. G. M. Smith of Purdue University.

The ears are about eight inches long, beautifully uniform in size and shape, and having from 10 to 14 rows. The thick, sugary kernels of Purdue Cross Golden Bantam are tender and sweet, meaty, of finest quality, and of a beautiful golden yellow color. Stalks are 6 feet high and produce two ears on each stalk under favorable conditions. 384—2 Oz. Pkg., 15c; 2 pkgs., 24c; ½ lb., 28c; 1 lb., 49c; 2 lbs., 78c; 5 lbs., \$1.75, postpaid.

## Salzer's Independence or 4th of July Corn

*Our Largest Eared, Heaviest Yielding, Extra Early Sweet Corn*

Our sales of this Sweet Corn have been enormous and are increasing from year to year. Our supply, although always larger than that of the preceding year, generally has been exhausted before the end of the season. We do not hesitate to say now that more of Salzer's Independence Corn has been planted all over the country in the last few years than of any other extra early sort. **Matures in 60 days.**

Comparative tests made in our trial ground prove Salzer's Independence far superior in size, productiveness and delicious quality to any other first early variety; the many testimonials we have received, a few of which are printed here, show the satisfaction this corn has given wherever used.

The vigorous stalks grow about five feet high and frequently produce two fine long ears, 10 to 12 rowed, and about 10 inches long, which are very symmetrical and handsome. The grains, which are tightly set, are large, deeper than broad, very white, and are of an exquisite fine quality, usually found only in the later sorts. Quite often reports have reached us of ears of our Independence Corn having been in edible condition in 50 to 55 days from planting the seed, and if sown in the fore part of May in our section in a favorable season, luscious ears of this variety should surely be ready for the table by **July the 4th.**

Salzer's Independence or Fourth of July Corn, an introduction of ours of over a quarter of a century ago, yields first place to none for extreme extra-earliness, and is the

earliest white sweet corn grown. It is the **LARGEST EARED** and **HEAVIEST YIELDING EXTRA EARLY SWEET CORN**, bar none. A great seller at market. **Sixty days from planting** one should pluck mature sweet corn, so that at your Independence Day dinner you can serve sweet, luscious, tender, finest quality corn on the cob—**ears 10 inches and more in length**, each having 10 to 12 rows, symmetrical, handsome, and with nicely rounded, rather blunt, tips.

Mr. Arthur Lavone, 822 Grove St., Cedar Falls, Iowa, writes, "Am sorry I did not order more of your **Fourth Of July Sweet Corn**. I made more money on that, than on anything else." Mr. J. D. Vogt, R.D. 2, Box 884A, Escondido, Calif., writes, "Planted your **Fourth Of July Sweet Corn** on May 5 and picked ripe ears July 8." Mr. L. O. Champe, Garnett, Kansas, writes, "I picked my first **Independence** or **Fourth Of July Corn** today, June 23. Will be sold out before the **Fourth**." Mrs. Edgar Adams, Kutztown, Penn., writes, "Your **Fourth Of July Sweet Corn** was wonderful." Mr. Frank M. Telfer, R.D. 2, Fort Atkinson, Wisconsin, writes, "We had wonderful success with your **Fourth Of July Sweet Corn**."

# ZER'S

## Honey Boy—

Unusually early, unusually sweet, high in sugar content, handsome, attractive, tender and juicy. Salzer's Honey Boy is popular with the market gardener, as maturing in 55 days in this northern climate. It enables him to get the first edible sweet corn to market and to reap the consequent high prices. Popular with the home gardener as it enables him to grow delicious, melting quality sweet corn for his table in an astonishingly short time.

### Honey Boy Is a Desirable Extra Early Corn

Developed for a short season, it is one of the best extra early sweet corns for any district and especially for the entire Northwest. Like all extra-early varieties, the stalks are slender and grow 4 to 5 feet high, and the ears are about sixteen inches above the ground. Being a free stooler, it shoots up many stalks, hence is a heavy yielder. Ears are straight and uniform, handsome, nicely rounded at the tips, average 7 inches in length and contain 12 to 14 rows of creamy white, fat, plump, sweet and delicious kernels.

**Price of Honey Boy:** 366—2 Oz. Pkg., 11c; 2 pkgs., 17c; ½ lb., 22c; lb., 34c; 2 lbs., 63c; 5 lbs., \$1.34, postpaid.

## GOLDEN SUNSHINE

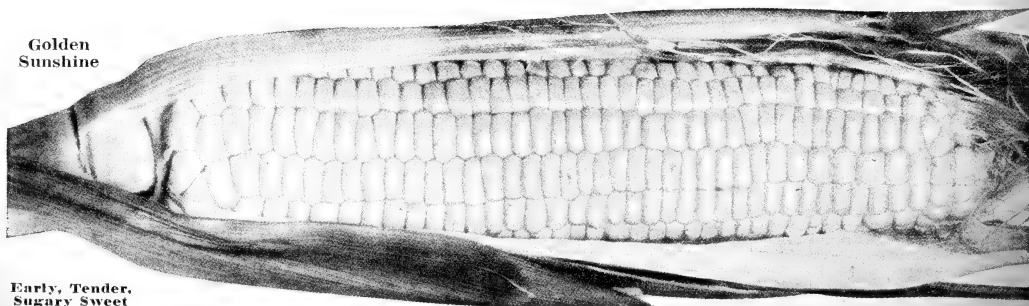

Stalks are 4½ feet high, usually carrying 2 or more fine ears about 7 inches long which are 12-rowed and packed with broad, deep, rich golden yellow kernels of the most sugary, tender and luscious quality that has ever been produced. Matures in about 65 days. Whether for your own garden or for the market, don't fail to plant it this spring.

Anyone who sells at market, knows the premium the good housewives pay for the extra-early supplies of cabbage, lettuce, sweet corn, tomatoes, etc. Every gardener we know, who planted Golden Sunshine last year, has definitely and positively determined upon a larger planting this year.

Every home gardener who planted it, remembers with satisfaction the early date at which the delicious, juicy, tender, sugary cobs of golden corn were served steaming hot at the table! Golden Sunshine does well in all sections of the country! 406—2 Oz. Pkg., 7c; 2 pkgs., 12c; ½ lb., 17c; lb., 29c; 2 lbs., 55c; 5 lbs., \$1.18, postpaid.

12 days earlier than Golden Bantam, maturing in 58 days! One of the most resistant to Stewart's Disease or Bacterial Wilt! A heavy yielder, each stalk having 2 to 3 ears, 6-7 inches long, 8 to 12 rows of deep, luscious, yellow kernels, of best quality! In tests, was ready for picking in 56 days! Stalks strong and erect, 5-6 feet high!

The ears are 6 to 8 inches long, about 80% of them 8 rowed and the balance running 10 rows, uniform in maturity, kernels quite large, in color a deep butter yellow. The kernels are tender, sugary sweet and of very good quality.

Minihybrid 202 is a heavy yielder, the increased yield more than compensating for the slight extra cost. Splendid for both the home gardener and the market gardener.

410—2 Oz. Pkg., 15c; 2 pkgs., 25c; ½ lb., 30c; lb., 55c; 2 lbs., 85c; 5 lbs., \$1.93, postpaid.

## SALZERSALAD

### The Delicious Salad Plant

Salzersalad is a distinct salad plant of recent introduction, that is most delicious when used in a number of ways. The sweet and tender stalks may be cut or diced raw for salads, they may be cooked and creamed like asparagus or celery, serving them hot, the tops may be cooked and served as greens, or the entire young plants may be cooked for greens, so necessary for the physical system. Doctors tell us that plenty of "greens" are very beneficial and necessary for good health.

Salzersalad was bred from Chinese or Celery cabbage and has heavily crumpled deep green leaves borne on long, thick, white, closely folded stalks, tender, sweet and delicious. It is so much superior to anything heretofore offered, that we know it will give the utmost satisfaction. Salzersalad yields heavily and over a long period, being quite slow to go to seed.

Healthful and tasty, both raw and cooked, Salzersalad has been declared the most delicious salad plant ever produced, by all who have tried it. 1050—Pkg., 10c;  $\frac{1}{2}$  oz., 15c; oz., 24c; 2 oz., 42c;  $\frac{3}{4}$  lb., 72c; lb., \$2.50, postpaid.

**Salzersalad—Try It This Year!**  
Delicious, Creamed Like Asparagus  
or Served Raw!

## TASTYGREEN—The Wonder Vegetable!

Tastygreen, the wonder vegetable, is rich in protein, mineral matter, and other elements so necessary to the development and maintenance of the human system. "Greens" are highly essential to our well-being, and of these, Spinach is perhaps the most widely planted and the most widely used, although unpalatable to many.

Tastygreen, the wonder vegetable, is far superior to Spinach or any of the other greens, and has a delicious flavor all its own, slightly and agreeably pungent with a Mustard taste when served hot, and when eaten raw, the flavor somewhat resembling raw Turnips. It is very rich in body and bone-building material, the Alabama Polytechnic Institute, Auburn, Alabama, reporting a content of 22.81 per cent Protein, 25.01 per cent Mineral Matter, 2.10 per cent Lime, 0.11 per cent Iron, and 2.45 per cent water. We believe that Tastygreen is going to become one of America's most popular vegetable greens.

Customers should give Tastygreen a trial this year, as everyone who has tried it, pronounces it delicious and

very much superior to Spinach. Tastygreen has small thin roots, about two inches long, and large oblong shaped leaves, rich dark green color, with a narrow white center rib. The leaves, stem and all, are prepared for table use in the same manner as Spinach or Turnip greens. It is very prolific and bears abundantly. The plants grow quickly and are ready for use in 21 to 23 days after planting. Successive sowings may be made, although the plants are very slow to go to seed; at Cliffwood Farms, plants sown in June had not gone to seed on September 5, two and one-half months later. Tastygreen withstands to a remarkable degree, extreme, dry, hot weather conditions, and will grow and produce bountifully during our spring and summer months, and in the south, during most of winter also.

Home gardeners, do not fail to plant this delicious and tasty new vegetable in your garden this year. Market gardeners, plant a small acreage to it at least, and see for yourself how rapidly the crop sells at market!

Lettuce

## LETTUCE

### SALZER'S EARLIEST LETTUCE

**EARLIEST CURLED OR LOOSE LEAVED LETTUCE.  
DELICIOUSLY CRISP AND TENDER, EASIEST  
TO GROW**

Yields an abundant crop of attractive light green leaves, heavily curled, of remarkably crisp texture, and of the finest flavor. The quality and flavor even of the outside leaves is fully equal to if not better than the tender heart leaves of many heading varieties. Salzer's Earliest is one of the most widely planted in all sections of the country, and especially in the great West. It is such a strong grower that it thrives everywhere.

It is an admirable variety for outdoor planting, especially in early spring and it is also most suitable for greenhouse forcing. It is the lettuce for planting all summer long. Extremely popular for winter markets. The lower leaves grow clear of the ground so that it rarely suffers from rot. It is an ideal shipper and will prove most profitable for the grower, whether he sows seed in a hotbed or out of doors. We consider it the best non-heading lettuce for the home garden. Salzer's Earliest Lettuce affords crisp, tender, attractive, finest quality leaves long before the heading sorts have commenced to close up.

540—Pkg., 15c; oz., 22c; ¼ lb., 60c; ½ lb., \$1.10; lb., \$1.95, postpaid.

### WHITE SEEDED SIMPSON

Also known as Early Curled Simpson. A curled or crisp non-heading type, medium large, much crumpled leaves of a light green color. It is an early growing, hardy variety and is sure to give fine results even under unfavorable conditions. Tender, crisp and of excellent quality.

559—Pkg., 5c; oz., 18c; ¼ lb., 52c; ½ lb., 90c; lb., \$1.65, postpaid.

### SALZER'S GRAND RAPIDS

Curled or crisp, non-heading, light green, leaves wavy, fringed and very curly, a good shipper. Very popular and widely grown.

541—Pkg., 5c; oz., 16c; ¼ lb., 47c; ½ lb., 85c; lb., \$1.50, postpaid.

### BLACK SEEDED SIMPSON

One of the standard varieties. A non-heading, curled, bunching, crisp variety, attractive light green color. It reaches a large size, grows quickly, is early, of fine quality, tender and sweet, and thrives splendidly during the hot summer months. Easily grown by the home gardener and much used by market gardeners for hot bed culture.

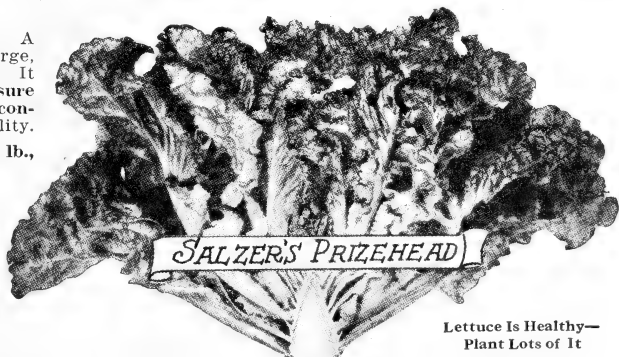

554—Pkg., 5c; oz., 16c; ¼ lb., 47c; ½ lb., 85c; lb., \$1.50, postpaid.

580—Black Seeded Simpson, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 10c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

### SALZER'S PRIZEHEAD LETTUCE

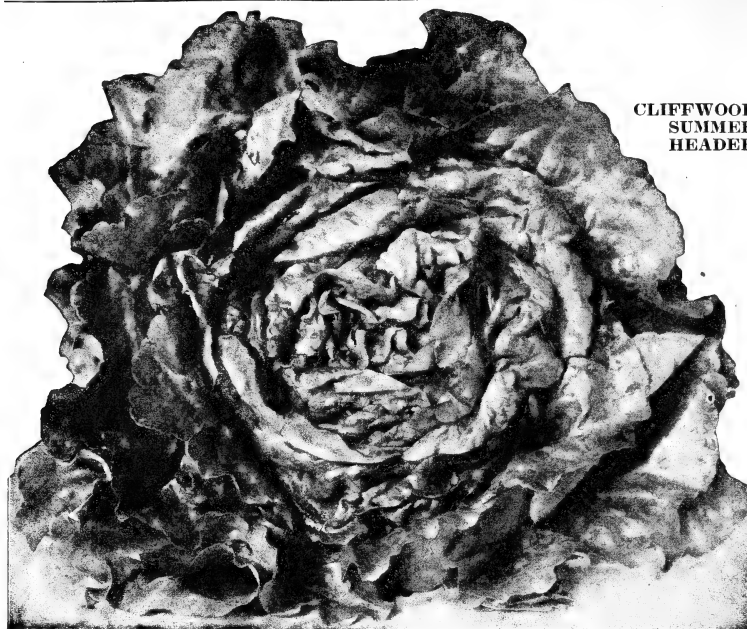

Is one of the best and most reliable varieties for all-year-around cultivation. The name is a trifle misleading, as it is a loose leaved or curled variety, and does not make a head. Plants form a loose cluster of leaves which are exceedingly tender, quite blistered and crumpled, sweet, crisp, and are of light brown color varying to a medium green base. Salzer's Prizehead reaches a very large size without losing its tenderness or crispness. 575—Pkg., 7c; oz., 16c; ¼ lb., 47c; ½ lb., 85c; lb., \$1.50, postpaid.

545—Prizehead, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 12c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

## CLIFFWOOD SUMMER HEADER LETTUCE

### CLIFFWOOD SUMMER HEADER

A superb head lettuce that we introduced in 1927, that forms solid heads despite hot weather, a thing which has hitherto been almost impossible. In tests on our Cliffwood Farms, practically every plant formed a fine, firm, solid head of butterhead lettuce of the finest flavor during the heat of summer.

The leaves are light green, crumpled, thick and tender, blanching to creamy white in the center of the head. Heads are large, about 8 to 10 inches in diameter, they have a delicious rich, buttery flavor, and they are the last to go to seed. It stands heat better than any other variety, without wilting.

577—Pkg., 14c; oz., 24c; ¼ lb., 72c; ½ lb., \$1.35; lb., \$2.50, postpaid.

## IMPROVED HANSON

Exceptionally early, large globular, crisp heads which are firm and well blanching. The leaves are broad, crumpled and twisted, of light green color, never spotted or brownish. It is of very sweet flavor, and succeeds everywhere and at all times. It heads well during hot weather.

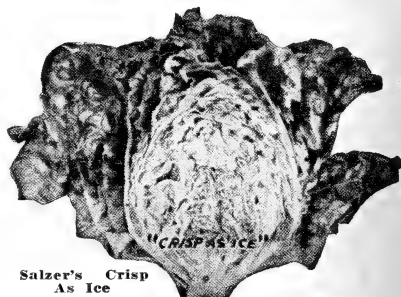

562—Pkg., 10c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$2.00, postpaid.

## SALZER'S CRISP AS ICE

A beautiful lettuce of medium size and medium early. Salzer's Crisp As Ice is a cabbage butter head lettuce, the leaves having a rich, attractive, deep green base, and upper portion covered with dark brown, giving the plant a deep brown or bronze appearance. A cool weather variety, valuable for both early spring and fall.

Has a rich, creamy heart, and when cut open is so crisp and brittle, it was given the name "Crisp As Ice."

556—Pkg., 12c; oz., 24c; ¼ lb., 80c; ½ lb., \$1.50; lb., \$2.75, postpaid.

## CALIFORNIA CREAM BUTTER

Salzer's California Cream Butter is a cabbage, butter head type, with thick leaves, large in size, of a beautiful and attractive rich dark green, tinged and spotted with brown. Ideal for the home garden. The heart of this excellent head lettuce is a rich golden yellow and has a most agreeable and delicate buttery flavor, hence the name Cream Butter. It is of first class quality, and it forms a fine solid head under any ordinary conditions.

561—Pkg., 10c; oz., 18c; ¼ lb., 52c; ½ lb., 95c; lb., \$1.75, postpaid.

546—California Cream Butter, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special selected strain. Pkg., 15c; oz., 22c; ¼ lb., 64c; ½ lb., \$1.14; lb., \$2.15, postpaid.

## SALZER'S ICEBERG

A most satisfactory crisp heading variety with curly leaves of light green tinged with brown on the edges. It forms a hard head of crisp tender quality, and blanches to a creamy whiteness. One of the best for the home garden and home market. 563—Pkg., 9c; oz., 19c; ¼ lb., 54c; ½ lb., 98c; lb., \$1.85, postpaid.

California Cream Butter Lettuce

We planted your California Cream Butter Lettuce last year and it was the best we ever ate. The heads were beautiful.—Mr. Helmer O. Johnson, Mesaba, Minnesota.

## NEW YORK OR WONDERFUL LETTUCE

A curled or crisp heading variety, large, dark green and slightly curled on the edges. It is the most extensively grown of any of the head lettuces by market gardeners, and it is likewise in much favor with home gardeners everywhere. The mature head is flattish globular, and has well folded leaves with the immediate outside leaves slightly incurved to protect the head from sunburn. The heads range from 16 to 18 inches in diameter and weigh from 3 to 3½ pounds each.

The heart is beautifully blanched, creamy white, crisp, tender, and free from any trace of bitterness. It is robust and is a standard hot weather variety. 565—Pkg., 10c; oz., 23c; ¼ lb., 72c; ½ lb., \$1.35; lb., \$2.50, postpaid.

547—New York or Wonderful, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 15c; oz., 28c; ¼ lb., 85c; ½ lb., \$1.59; lb., \$2.95, postpaid.

## NEW YORK NO. 515 LETTUCE

Similar to the New York lettuce above, but the color is a brighter green and the head is somewhat better formed, and smoother. Resistant to tipburn and sure heading in warm weather. It is the surest heading strain of the New York type that we know of and practically every plant makes a good head even during hot weather.

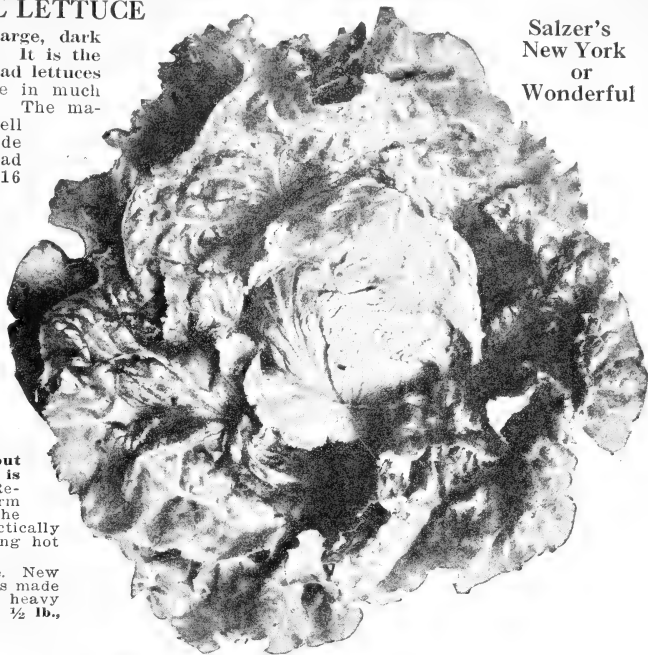

Heads are large, solid, crisp and attractive. New York No. 515 may also be sown late, sowings made about August 1 producing good heads up to heavy frosts. 567—Pkg., 15c; oz., 26c; ¼ lb., 79c; ½ lb., \$1.45; lb., \$2.75, postpaid.

## SALZER'S BIG BOSTON

A cabbage head, butter type, medium large, about 11 inches across, finely shaped, globular, medium light green with a slight tinge of brown on margins of outer leaves. It is early and hardy, and stands shipping well. The leaf is smooth and is practically not blistered or crumpled, with a tendency to a bright sheen. Heads are tender, brittle, juicy, fine buttery flavor, and the interior is an attractive light golden yellow. 553—Pkg., 5c; oz., 18c; ¼ lb., 52c; ½ lb., 95c; lb., \$1.75, postpaid.

581—Big Boston, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests. Pkg., 10c; oz., 22c; ¼ lb., 65c; ½ lb., \$1.15; lb., \$2.15, postpaid.

## CREAMY HEART LETTUCE

A black-seeded cabbage head lettuce of the butter type, medium green color and of medium size. The head is firm and solid and the heart is a very rich cream color. It has a very firm, tender, buttery flavor, matures early, is slow to go to seed, and stands the heat of summer well.

It is much superior to many of the other butter types of lettuce, both in quality, earliness and ability to form sound, solid heads. Is considered a sure header. 579—Pkg., 9c; oz., 19c; 2 oz., 34c; ¼ lb., 54c; ½ lb., 98c; lb., \$1.85, postpaid.

## PARIS WHITE COS LETTUCE

The Cos Lettuces are distinguished from other lettuces in that their leaves are elongated and almost always somewhat spoon-shaped. They are grown in exactly the same way as other lettuce. When young, the leaves are pale green. When full grown, they form a loose, conical head, outer leaves light green and rather crimped, inner leaves very pale green with the midrib white and very prominent. Very crisp and has a delicious flavor.

Succeeds very well everywhere, never wilts under the severest sun and can be grown to an immense size; plants weighing six pounds have been grown of this variety.

598—Pkg., 5c; oz., 18c; ¼ lb., 52c; ½ lb., 95c; lb., \$1.75, postpaid.

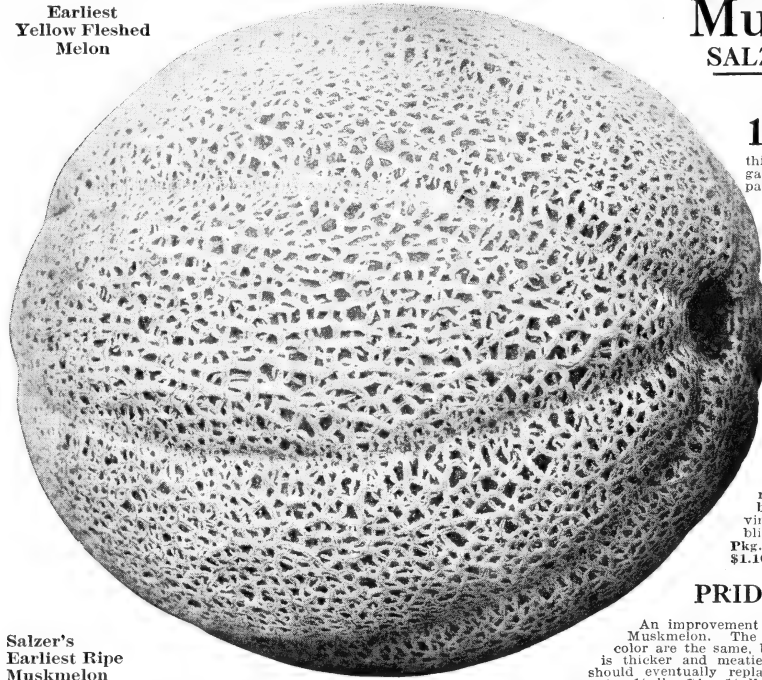

## CHINESE OR CHICKEN LETTUCE

You have doubtless often read that lettuce is an excellent feed for chickens. In this variety you will find a feed that yields more than other green feeds, and that is much preferred by poultry. When Salzer's Chicken Lettuce is cut, it grows rapidly again, and may be cut again and again. The yield is extremely heavy; grows 3 to 4 feet high and does not form a head. For table use, it perhaps will be found too coarse. If you have any chickens, by all means sow some this spring.

578—Pkg., 5c; oz., 14c; 2 oz., 26c; ¼ lb., 39c; lb., \$1.25, postpaid.

I have always had good success with everything from Salzer's. Have been ordering for 65 years, first for my mother, later for myself. Am 80 years old and enjoy my garden.—Mrs. G. W. Bauder, 609 So. Meldrum St., Ft. Collins, Colo.

## SALZER'S EARLIEST RIPE MUSKMELON

**10 CENTS  
PKG.**

Earliest of All. Our attention was called to this Melon many years ago by a market gardener near La Crosse, who for the past years has always had Muskmelons from 8 to 15 days ahead of his neighbors. These Melons were of uniform size, of fine shape and appearance, yellow fleshed, extremely delicious, and sold readily in our markets from \$1.25 to \$2.00 per dozen, the profit to an acre being something enormous, as all the Melons were usually sold before other sorts came into the market.

THIS IS THE EARLIEST YELLOW-FLESHED MUSKMELON that we know of, being ready for the market in about 60 days after planting. It is of oval shape, as may be seen by the illustration, of good size, about five inches in diameter, with fairly distinct ribbing, heavily netted. The flesh is exceptionally thick, of a rich salmon-yellow color, sweet, luscious and melting, and the flavor is unsurpassed by that of any other variety. The vines are robust and vigorous, resisting blight to a marked degree. **606—**Pkg., 10c; oz., 19c; ¼ lb., 60c; ½ lb., \$1.10; lb., \$1.95, postpaid.

## PRIDE OF WISCONSIN

An improvement on the Sugar Rock or Honey Rock Muskmelon. The shape, heavily netted rind and the color are the same, but the delicious orange colored flesh is thicker and meatier, and the seed cavity smaller. It should eventually replace Sugar Rock. **637—**Pkg., 10c; oz., 21c; ¼ lb., 71c; ½ lb., \$1.35; lb., \$2.50, postpaid.

## SALZER'S SUGAR ROCK MUSKMELON

**7 CENTS  
PKG.**

A Type of Muskmelon That Is Creating a Sensation! Also Known as Honey Rock!

Salzer's Sugar Rock is one of the most prolific melons on the market today. It is strikingly attractive and distinct from all other sorts. Fruits are oval, of good large size, without ribbing and heavily netted. Matures in about 80 days.

Four characteristics describe this melon: productiveness, striking appearance, quality, and ability to stand shipping and handling. The flesh is deep and thick, orange color, with a sugary and luscious flavor that is unequaled today. It is so aromatic that one melon, uncut, will scent a room with its sugary odor.

The outside rind is light golden yellow overlaid with heavy gray netting, and is so tough that ripe melons may be picked and then shipped a long distance and arrive in good condition. Vines are strong and vigorous and do not show any trace of blight. **626—**Pkg., 7c; oz., 16c; 2 oz., 28c; ¼ lb., 49c; ½ lb., 85c; lb., \$1.50, postpaid.

## BENDER'S SURPRISE

It combines the thick, luscious, golden flesh of the Osage with the heavy netting and thin rind of the Netted Gem type of Rockyford and averages about 5 inches in diameter, making it an ideal basket and crate melon. It is extremely resistant to rust, is remarkably hardy and withstands heavier frosts than other varieties. 75 days. **619—**Pkg., 5c; oz., 15c; ¼ lb., 52c; ½ lb., 95c; lb., \$1.75, postpaid.

The flesh is salmon colored, exceptionally thick, with small seed cavity, and of excellent flavor. It is extremely early. The melons are oval, about 8 by 4½ inches, heavily netted, and ship farther than any other kind. Ideal for the home garden. **633—**Pkg., 10c; oz., 16c; ¼ lb., 49c; ½ lb., 85c; lb., \$1.45, postpaid.

**MILWAUKEE MARKET—**Light green skin, fruits nearly round, deep, thick, luscious salmon colored flesh that has practically no tendency to stringiness, and which is deliciously sweet. **622—**Pkg., 5c; oz., 17c; ¼ lb., 49c; ½ lb., 90c; lb., \$1.65, postpaid.

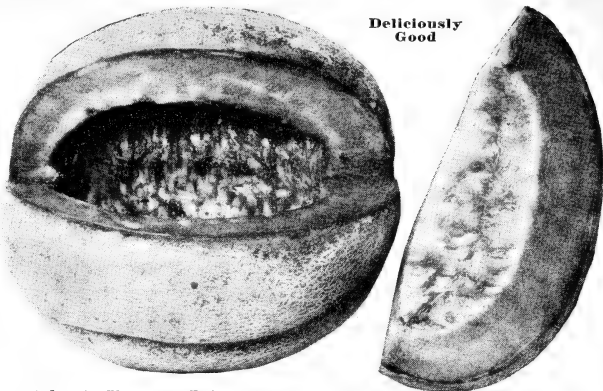

I have grown Salzer's Earliest Ripe Muskmelon for seven years and it is the best in the world. Picked over 300 melons from eleven vines.—Mr. C. D. McIlree, 615 Lincoln St., Ellsworth, Kansas.

## SALZER'S JUICY FRUIT

Salzer's Juicy Fruit, introduced by us over twenty years ago, is the grandest salmon-fleshed melon in cultivation today, it is medium early, it is wonderfully sweet, it is a heavy yielder, it is devoid of stringiness, it is very meaty and it has a small seed cavity.

Mrs. G. F. McClelland, 510 Second Ave. South, Escanaba, Mich., writes, "Your seeds were fine, especially your Juicy Fruit Melons." Mr. R. G. Cusick, R. D. 1, Box 160, East Stanwood, Wash., writes, "Your Juicy Fruit Melons are unbeatable. Have proved them in Eastern Oregon and Western Washington."

The skin is an attractive light green, the fruits reach a very large size, they are nearly round with slight sutures, and the thick salmon colored flesh is the sweetest, the most luscious, the most sugary flavored, that we have ever eaten. The melons are uniform in size and pack nicely ten to a crate. Ideal for the home gardener, and truckers always find a heavy demand for the melons at market. 605—Pkg., 14c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.00; lb., \$1.85, postpaid.

On the La Crosse market, the earliest melons fetch prices of 50c to 80c each! Salzer's Earliest has been a money maker for market gardeners for years and is in no less demand by the home gardener who wants the very earliest, luscious watermelons for his own use.

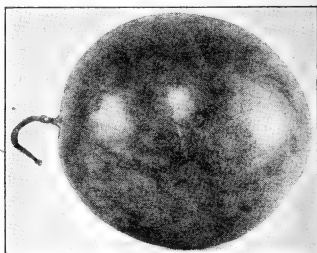

Salzer's Earliest reaches a large size, weighing from 25 to 30 pounds, is rather round in shape, of an attractive light green color and striped irregularly with darker green. It is enormously prolific, vines are vigorous and hardy and it is decidedly a short season melon and especially adapted for the North. The sparkling, crisp, red flesh is of wonderfully fine texture, has a delicious and exceptionally sweet flavor and ripens down to the rind. Unusually uniform in size and shape, it is a splendid shipper, and is a leading market variety in all parts of the country. Even in sections too cool to ordinarily grow a crop of watermelons, Salzer's Earliest will ripen fine large melons.

It's the greatest, earliest, big profit pea! Hundreds of thousands of customers, small buyers and large buyers, all over the United States and in foreign countries have sown this world-famous strain, and everybody acknowledges it the earliest, finest quality, and biggest money-making round, smooth pea in cultivation.

**Salzer's Earliest and Best** matures the entire crop at one time. It grows from 18 to 24 inches high, is extremely prolific, bearing from 6 to 8 straight pods, 2½ inches long, each containing 6 or 7 medium sized, smooth, round peas, which are sweet and of excellent flavor. ## SALZER'S GIANT EXHIBITION

### Huge Pods—Luscious Quality Peas

To those who wish huge podded peas, we suggest that they plant Salzer's Giant Exhibition. It is a late maturing kind. Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, although large, are of a fine quality, sweet, sugary flavor and not tough as one would expect. The pods frequently grow to seven and even eight inches in length, depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigor-ousness. It has numerous first prizes to its credit, from various fairs, which accounts for its being named Exhibition. One of the best main crop varieties.

Pods rather straight, with curve near end. Vines grow vigorously. Ready to use in about 85 days. 872—2 Oz. Pkg., 15c; 2 pkgs., 24c; ½ lb., 30c; 1 lb., 39c; 2 lbs., 72c; 5 lbs., \$1.58, postpaid.

### DWARF DEFIANCE

The best of the main crop varieties of large podded, dwarf peas; it is fit for the table in 76 days from planting. The vines are about 24 inches high. Pods are long, broad, pointed, dark-green in color and often measure 5 inches or more in length and generally contain 8 to 9 peas. These peas are very large and in flavor and sweetness rank with the highest. The peas retain their tenderness long after they have been picked. Also a splendid variety for the home gardener, because of its compact, bushy growth, permitting a good heavy yield in a limited space. 892—2 Oz. Pkg., 10c; 2 pkgs., 15c; ½ lb., 21c; 1 lb., 35c; 2 lbs., 64c; 5 lbs., \$1.45, postpaid.

This fine, wrinkled variety has all of the qualities of the old well known Tall Telephone pea, but is of dwarf growing habit, attaining a height of 20 to 24 inches. Matures in about 71 days.

The vines are of vigorous growth, producing large pods in great profusion and about a week earlier than the tall variety. The pods are about 4½ to 5½ in. long and contain eight to ten green, wrinkled peas of delicious flavor. 892—2 Oz. Pkg., 8c; 2 pkgs., 14c; ½ lb., 19c; 1 lb., 34c; 2 lbs., 62c; 5 lbs., \$1.43, postpaid.

## Parsnip

### SALZER'S HOLLOW CROWN

Parsnips prefer very wet soil and will thrive where carrots will not grow. A freeze is required to sweeten them. For the best results, deep soil is needed.

Salzer's Hollow Crown is enormously productive, roots are 10 to 12 inches long and about 3 inches thick at the shoulder. It is rich in saccharine, has smooth white skin, is uniform in shape, is sweet, tender, sugary. Not only of fine table quality, but very desirable for stock feeding. Also relished by horses. Matures in 130 days. 832—Pkg., 10c; oz., 22c; 2 oz., 38c; ¼ lb., 64c; ½ lb., \$1.19; lb., \$2.15, postpaid.

### IMPROVED SHORT THICK

This new little parsnip makes a fine garden vegetable. The tops are very small, the roots are short and thick, about 3 inches through and about 6-7 inches long. Its short, thick character make this parsnip easier to pull than the older sorts, and it does not require such deep soil. Has a sweet, delicate flavor. 119 days. 836—Pkg., 10c; oz., 23c; 2 oz., 40c; ¼ lb., 69c; ½ lb., \$1.24; lb., \$2.35, postpaid.

### SALZER'S DELMONICO

This nationally famous strain, introduced by us, does not require such deep soil for its cultivation. It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the flesh is fine-grained, sweet, sugary, tender and most excellent for table use. Very early, maturing in about 115 days. It is a most prolific yielder. It contains more saccharine, is sweeter and more nutritious than other sorts, and as it is so easily harvested, large acreages are grown for stock feeding. Thrives on almost any soil. This splendid variety surpasses every other in yield and quality. 833—Pkg., 12c; oz., 28c; 2 oz., 50c; ¼ lb., 85c; ½ lb., \$1.58; lb., \$2.95, postpaid.

### IMPROVED GUERNSEY

Heavy yielder, smooth roots, flesh fine grained and of an excellent flavor. It is half-long, thick and short and is easily dug. A dependable type. 834—Pkg., 10c; oz., 24c; 2 oz., 44c; ¼ lb., 75c; ½ lb., \$1.35; lb., \$2.50, postpaid.

## Rhubarb—SALZER'S MONARCH

Rhubarb is used extensively for making tarts, pies, sauces and preserves. No plant is more easily increased and multiplied than rhubarb. No other Rhubarb excels Monarch in richness, tenderness, juiciness, earliness, or freedom from stringiness. See Index for Roots. 1053—Pkg., 10c; oz., 28c; ¼ lb., 85c; ½ lb., \$1.58; lb., \$2.95, postpaid.

## Parsley

**SALZER'S PARAMOUNT** Exquisitely curled, deep green color, and highly ornamental for garnishing purposes, with a spicily pungent flavor! The plants grow about 12 inches tall and the texture is more uniformly and attractively "triple curled" than older strains. Of exceptionally deep rich green color. Paramount is a great improvement over the older sorts and is a striking variety for uniformity in type of plant and color. 828—Pkg., 12c; oz., 17c; ¼ lb., 49c; ½ lb., 90c; lb., \$1.65, postpaid.

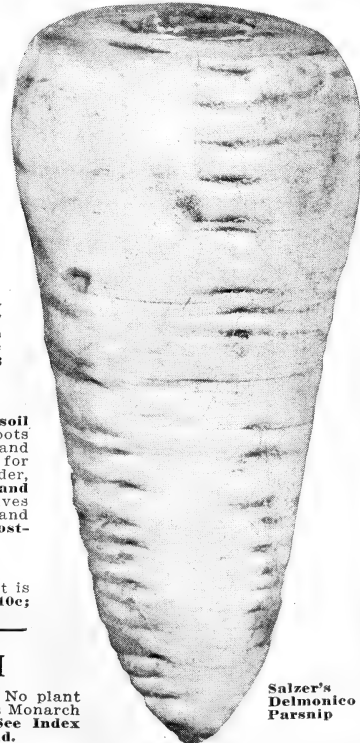

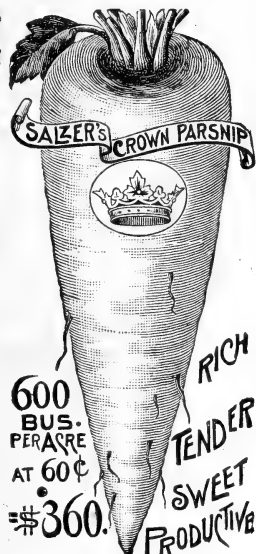

**DOUBLE MOSS CURLED**—Grows about 7 or 8 inches high, is of rich dark green color and is a handsome decorative type, the leaves being beautifully crimped and curled; often used as a border for beds and walks and is unsurpassed for garnishing meat dishes, etc., and for flavoring soups and other dishes. Parsley germinates slowly, but is hardy and easy to grow and thrives on almost any soil. Matures in about 65 days. 822—Pkg., 10c; oz., 15c; ¼ lb., 44c; ½ lb., 75c; lb., \$1.35, postpaid.

**830—Double Moss Curled, Salzer's Cliffwood Farm TRIPLE-A-TESTED**—A special reselected strain certified by THREE-WAY tests: Pkg., 15c; oz., 19c; ¼ lb., 53c; ½ lb., 98c; lb., \$1.85, postpaid.

**TURNIP ROOTED**—This variety of parsley is grown for its thick, fleshy root, which resembles a small parsnip, and which is most delicious in soups, stews, etc. Flesh is white and fine grained. Keeps well for winter use.

826—Pkg., 8c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; lb., \$1.45, postpaid.

# Radish

## Salzer's Early Bird

Handsome—Deliciously Spicy

We introduced this grand variety over 45 years ago and have been extensively developing and improving it ever since, so get your seed from us if you want genuine, true-to-type seed. Don't take anything "just as good." Salzer's Early Bird is of globe-shape, bright scarlet color, has very short tops, flesh is pure white, fine grained, crisp, nice, spicy taste, and never becomes hollow or pithy. Averages  $\frac{1}{2}$  to 1 inch in diameter, according to maturity. It is alike most valuable for outdoor planting in spring or in autumn, and usually commands top prices.

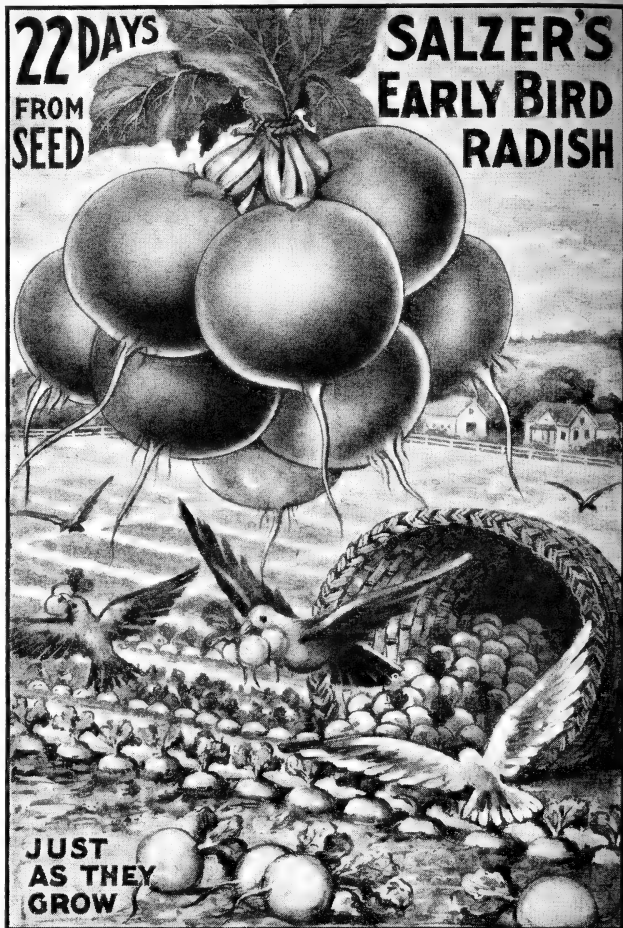

Salzer's Early Bird, the incomparable radish, has produced radishes ready for the table in 22 days' time and less, radishes that were uniform in size and shape, uniform in maturity, with small tops and of beautiful and attractive bright red color. It is also one of the best strains for growing under glass.

Mr. E. J. McClellan, 1114 E. Nebraska Ave., Spokane, Wash. writes, "I think your Early Bird Radishes are the finest for the home garden that I have ever grown." Mr. L. M. Gossman, 820 N. Duluth Ave., Sioux Falls, S. D., writes, "Your Early Bird Radishes are turning out so nicely under adverse conditions, that I am ordering some more seed so I have more coming along." Mrs. Arne M. Olson, R. D. 3, Brockton, Mont., writes, "Have planted your Early Bird Radish for the past five years as it is the earliest radish I have ever grown and brings a fine profit. I sold 1800 bunches last spring and am well known in several towns for my wonderful radishes." Mrs. Louie Brimmer, R. D. 2, Box 9, Plum City, Wis., writes, "Your Early Bird gives us radishes before any one else has any." Mr. Fred Friday, Cambria, Wis., writes, "Your Early Bird Radishes were fine."

Salzer's Early Bird is a sure yielder and will not disappoint a single market gardener nor home gardener who sows it, but will be a source of genuine pleasure and profit. We know of none of our vegetables that will pay the market gardener better, and that is more desirable for the kitchen garden, than Salzer's Early Bird Radish, planted and sown in every section of the country.

Now, the substance of the whole matter is this: If you are at all anxious, either as a market gardener or as a grower of Radishes for your own private table, to have Radishes from 3 to 10 days ahead of your neighbor, and if you are anxious to have the finest Radish that seed can produce, even under the most adverse circumstances, then by all means plant Salzer's Early Bird. Its crisp, brittle flavor, as well as its remarkably quick growth and fine color, alike recommend it. In favorable weather the Radishes mature in about 22 days. Not only is Salzer's Early Bird extremely early, but it also yields heavily and its quality is unsurpassed. You will agree that it is the earliest, finest and best tasting radish that is grown to-day!

975—Pkg., 10c; oz., 15c; 2 oz., 28c;  $\frac{1}{4}$  lb., 47c;  $\frac{1}{2}$  lb., 84c; lb., \$1.45, postpaid.

# Radish

## Salzer's Earliest White

Pure white color, almost like crystal, so clear and transparent! Matures in about 18 days. It is a highly developed strain of finest quality and produces some of the earliest radishes that can be grown.

It is of olive shape, is adapted to all soils, has a very short top unusually thin skin, never becomes woody, flesh crisp, tender, and fine spicy taste. Equally good for outdoor sowing or for growing under glass. Home gardeners, sow this and Salzer's Early Bird Radish for the earliest, finest two radishes in your neighborhood. Market gardeners sow these two varieties and make money. Mrs. Charles E. Beadle, 414 North Second St., Marshall, Ill., writes, "Your Earliest White Radishes are extra fine. We can't do without them." # Salzer's Earliest of All Tomato

Although introduced by us many years ago Salzer's Earliest of All is still the leading extra early tomato, the earliest large-sized variety grown and we believe, as we are constantly improving it, it will hold its position and will stay on top as the **Earliest of All**.

With us in the North it has always been a study to produce extremely early vegetables, such as will ripen and produce perfect fruit in a short time, and in Earliest of All our efforts have been successful. Everybody who has tried it speaks of it in highest praise. Earliness in tomatoes is essential for the market grower and highly desirable for the home garden. Salzer's Earliest of All is the best extra-early so far produced; it is our very earliest strain; it is a "short season" tomato. Ripening in about 57 days, after setting out the plants, it is especially adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety.

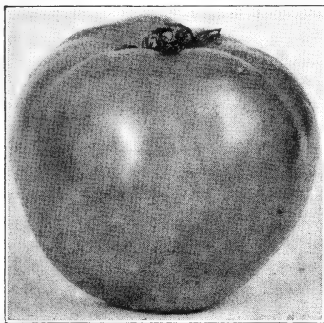

If you want the very earliest tomatoes, combined with fine flavor, meatiness, productiveness, attractiveness, and tenderness, you should plant our Earliest of All. It is bound to please the most particular.

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The fruits are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and keepers.

Mr. Bernard Kaiser, R. D. 1, Box 242, Burlington, Wis., writes, "Salzer's Earliest of All is the earliest tomato we ever had." Mr. E. H. Ferrel, R. D. 1, Filer, Idaho, writes, "We won First Prize at the Twin Falls County Fair with your Earliest of All Tomato." Mrs. C. H. Kiewer, R. D. 1, Great Bend, Kansas, writes, "Salzer's Earliest of All Tomato is the very best tomato we have ever had." Mr. H. Voetberg, Howden, Manitoba, Canada, writes, "I am the first with tomatoes at the Winnipeg Market, with your Earliest of All Tomato."

Price of Salzer's Earliest of All: 1118—Pkg., 15c; ½ oz., 35c; oz., 60c; 2 oz., \$1.00; ¼ lb. \$1.75; lb., \$6.25, postpaid. See Page 37 For Tomato Plants.

**SALZER'S FERRIS WHEEL**

The tomato is recognized by the medical profession as holding five points of merit which makes it actually indispensable in the vegetable garden. It is the richest of all foods in vitamins; it is the most wonderful and effective blood cleanser of all foods; it is the best of all vegetables for keeping the stomach and intestines in condition; it is an extraordinary tonic for the kidneys, and it is used widely in curing diabetes and Bright's disease. In addition, it is extremely valuable for feeding the juice to infants, accomplishing wonders in cleansing and building up the tiny stomachs. Every garden in the U.S. should contain at least a few tomato plants. Plant some this year!

**Salzer's Ferris Wheel** is of the large *Ponderosa* type and averages about 1½ pounds in weight, although at Cliffwood Farms we have grown specimens weighing over 4 pounds. Fruits have thick, solid, meaty flesh, which is of the finest quality, delicious, sub-acid flavor and very small seed cavity. The vines are strong and vigorous and easily bear their enormous weight of fruits which are of handsome appearance, smooth, and which have a rich, dark purplish-crimson skin. Salzer's Ferris Wheel has been continually developed for immense size, uniformity, flavor, productiveness and to resist any tendency to split. Matures in about 90 days. A grand tomato for the home gardener as well as for market gardeners. Elwood L. Brackin, R. D. 2, Marshallton, Del., writes, "I still plant your Ferris Wheel Tomato and think there is none better. Have sown Salzer's Seeds for over 40 years." Mr. J. W. Gertler, Beallsville, Ohio, writes, "On one plant of your Ferris Wheel Tomato there was a cluster of seven big, fully developed tomatoes. The seven weighed 8 lbs. 6 ozs. Am enclosing two photos of them."

1139—Pkg., 15c; ½ oz., 42c; oz., 75c; 2 oz., \$1.35; ¼ lb., \$2.40; ½ lb., \$4.45; lb., \$8.00, postpaid.

**SALZER'S IMPROVED PONDEROSA**

Rightly named "Ponderosa" because of the large size it attains. Fruit is very solid, with few seeds. Very often large tomatoes, from their very size, are rough and have a tendency to split, but we selected this seed so exhaustively that we have removed the roughness and splitting tendency as far as it is possible to do so. Vines are vigorous and productive. Fruits large, oblong, purplish red, with thin skin. Flesh is solid, with a very small seed cavity, making it a most desirable variety for slicing. To all who desire large size, solidity and flavor, we unhesitatingly recommend it. Requires about 85 days to mature. Mr. Claremont E. Peck, 1312 W. 22nd St., Kearney, Nebr., writes, "We like your tomatoes exceedingly well. They produce good. We have had especially fine gardens with all of your seeds."

1142—Pkg., 10c; oz., 64c; 2 oz., \$1.15; ¼ lb., \$2.10; ½ lb., \$3.95; lb., \$7.45, ppd.

1133—Improved Ponderosa, Salzer's Cliffwood Farm TRIPLE-A-TESTED seed: Pkg., 15c; oz., 77c; 2 oz., \$1.44; ¼ lb., \$2.50; ½ lb., \$4.70; lb., \$8.75, ppd.

**Salzer's Select Stone**

**King of the red tomatoes!** The leading main crop variety, extensively grown by market gardeners, ideal for the home garden. Grown extensively by canners for tomato soup, etc. Best of all for tomato juice.

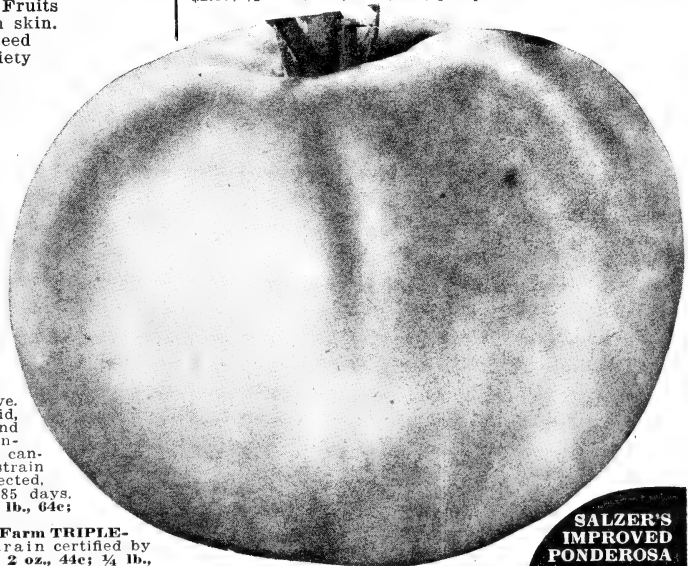

Vines are large, strong and productive. It is a smooth, large tomato, nice and solid, free from core and cavity. Nearly round in shape. The eating quality is exceptionally fine, has no superior for slicing or canning. Fruits are bright scarlet. Our strain of this variety is carefully grown, selected, rogued and cured. Matures in about 85 days.

1122—Pkg., 5c; oz., 21c; 2 oz., 37c; ¼ lb., 64c; lb., \$2.10, postpaid.

1132—Select Stone, Salzer's Cliffwood Farm TRIPLE-A-TESTED — A special reselected strain certified by THREE-WAY tests: Pkg., 10c; oz., 25c; 2 oz., 44c; ¼ lb., 75c; ½ lb., \$1.40; lb., \$2.65, postpaid.

We certainly enjoy doing business with your Company as everything is very satisfactory, both in plants and in seeds.

beauty. Mr. Acro Castle, Huysville, Ky., won the prize of \$25.00 cash for the largest tomato with a weight of 4 pounds 7 ounces. Think of a monster tomato like that! Mr. I. G. Haycroft, 7 East Washington St., Kensington, Md., writes, "I grew an enormous crop of smooth large tomatoes from your Peak of Perfection, so fine that they sold readily at \$1.50 per bushel." Mr. Raymond Beck, 2012 N. Jefferson St., R. D. 3, North Topeka, Kansas, writes, "Your Peak of Perfection is without exception the best tomato I have ever grown."

Peak of Perfection is practically free from seeds. The tomatoes are of a beautiful appearance, uniformly large and smooth, with a rich dark crimson skin, meaty, and have a delicious melting flavor. If it is size you want, and just a luscious, deliciously good, all around tomato, then you must plant Salzer's Peak of Perfection!

We gave free seeds of this tomato to our customers and friends in 1927 under the name of New Wonder and offered prizes for the largest tomato grown and for the best name for this tomato. Mr. I. G. Haycroft, 7 East Washington St., Kensington, Md., writes, "I grew an enormous crop of smooth large tomatoes from your Peak of Perfection, so fine that they sold readily at \$1.50 per bushel." ## RUTGERS

Originated by Prof. Schermerhorn of the New Jersey Agricultural Experimental Station. Rutgers is outstanding for the large size and solid structure of the fruit! Skin is dark red, with thick outer and inner walls, very small seed cavities, and the interior color is a beautiful dark red.

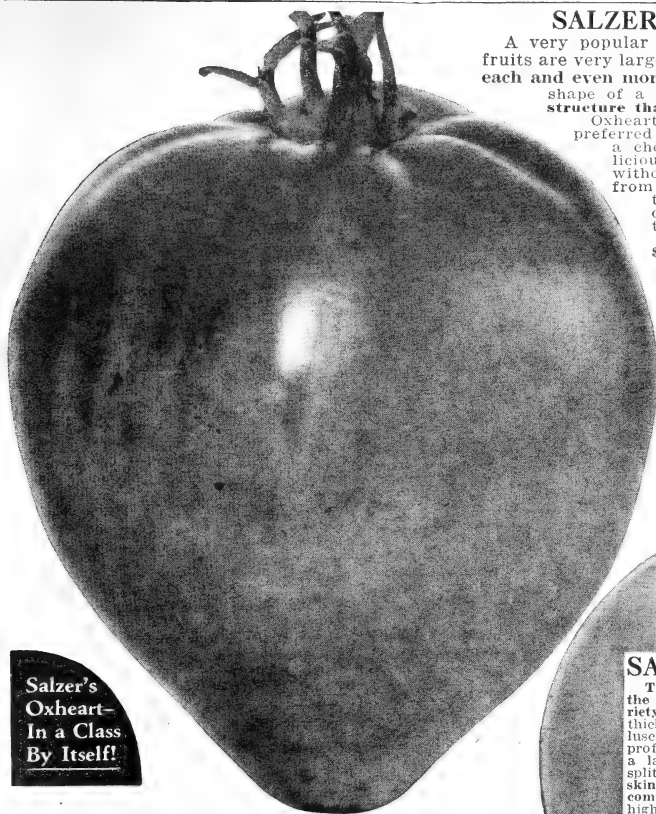

Maturing in about 85 days and the yield is very large, ripening an abundance of fruit even in the far northern climates, before the vines are killed by frost. It makes juice of low acidity and fine flavor and is a good canner, maintaining its firmness and deep red color when canned. Especially good for light sandy soils since the vines offer much protection for the fruit. Has yielded over 10 tons per acre! 1120—Pkg., 15c; ½ oz., 20c; oz., 35c; 2 oz., 64c; ¼ lb., \$1.15; ½ lb., \$1.98; lb., \$3.75, postpaid.

## MARGLOBE, DISEASE-RESISTANT

Marglobe is a cross between the Marvel and Globe tomatoes, developed by the U. S. Department of Agriculture, combining the second earliness of the former with the fine table quality of the latter. Marglobe is of fine scarlet color, globe shaped, of fine texture, deliciously mild in flavor, and wilt-resistant to a marked degree. Plants are of vigorous and heavy growth and very prolific. We have a record of one plant, on diseased soil, producing 107 large, fine round, best quality tomatoes. 80 days. Fine for tomato juice. 1130—Pkg., 8c; ½ oz., 16c; oz., 27c; 2 oz., 48c; ¼ lb., 80c; ½ lb., \$1.65; lb., \$3.00, postpaid.

I have been buying Salzer's Seeds for more than 52 years and have always found them satisfactory. Have grown Peak of Perfection Tomatoes weighing 3½ pounds.—Mr. J. E. Hegner, Chase, Michigan.

## SALZER'S OXHEART TOMATO

A very popular late variety, maturing in 90 days. The fruits are very large in size, often weighing one to two pounds each and even more, are purplish-pink in color, smooth, the shape of a beef heart, and with such a solid internal structure that there is very little room left for seed.

Oxheart is of very mild and sweet flavor which is preferred by many people to the more acid flavors. Is a choice tomato for salads, with its thick, delicious flesh! The flesh often shows an inch thick, without a single seed cavity. Receives its name from its shape, which is large at the stem end, tapering almost to a point. Vine growth is open and spreading, the fruits setting in clusters of 3 to 7.

1177—Pkg., 15c; ½ oz., 39c; oz., 74c; 2 oz., \$1.29; ¼ lb., \$2.30; ½ lb., \$4.35, postpaid.

## SALZER'S NORTON WILT-RESISTANT

If you have been troubled with wilt, plant Norton Wilt-Resistant Tomato. Has yielded 300 bu. to the acre on soil affected by wilt, while other varieties next to it, yielded 25 bu. The tomatoes ripen nice and solid on the vines. Firm, solid skin, is a wonderful shipper, of fine flavor, meaty, few seeds and very tender. Is a mid-season tomato, globular, and of a beautiful scarlet color. Fine for tomato juice.

1129—Pkg., 10c; oz., 26c; 2 oz., 48c; ¼ lb., 79c; ½ lb., \$1.45; lb., \$2.75, postpaid.

## The Best Barley for Malting Purposes.

Wisconsin Barless or Wisconsin Pedigree No. 38 Barley is a bearded variety that was originated by the Wisconsin Experiment Station by crossing a smooth awn oat from Russia with Odebrucker. It is a remarkably heavy yielder, with heavy, large and plump kernels.

The greatest feature of all, however, is the freedom from the troublesome awns in the beards. The smooth beards of Wisconsin Barless Barley make it easier to handle and makes both the straw and the grain more valuable for feeding. It is six rowed, has very stiff straw and is resistant to disease. It is a big improvement over the rough bearded barleys. Resistant to stripe disease. Sow 1½ to 2 bu. per acre.

**4285**—Radium Brand: Lb., 24c, postpaid to 4th zone. Not prepaid: Peck (12 lbs.), 60c; ½ bu., 95c; bu., (48 lbs.), \$1.65; 5 bu., \$8.15; 10 bu., \$16.10; 25 bu., \$38.75. Bags free.

It is a barley the farmers can depend upon to produce a big crop.

# OATS

**WHITE CROSS OR WISCONSIN PEDIGREE No. 19—** This wonderful early white oat, in fact the earliest of all oats, was awarded first premium at the Wisconsin State Fair.

Prof. B. D. Leith, Associate Agronomist at the Wisconsin College of Agriculture, bred this new oat after years of work. The object was to produce a high yielding early white oat, with a taller straw and a larger kernel than is usually found in early oats. The large kernel and white color make it attractive, and the tall straw is particularly desirable in localities where the soil is light. Has a branching habit and is a good rust-resister. It has a tendency to lodge on rich soils, but is especially well adapted to sandy soils. 4625—See prices above.

**STATE'S PRIDE OR WISCONSIN PEDIGREE No. 7—** Earliest yellow oat. Prof. B. D. Leith, University of Wisconsin, points out that in spite of unfavorable weather, State's Pride yielded 75.7 bushels per acre. Earliest of all yellow oats and best because it is an excellent nurse crop and escapes rust, because of its earliness. Does not lodge easily, but fills out the kernels, if it does, making it especially desirable for rich soils. Has a very short, stiff straw. It is a yellow oat, bright, shining, thin hulled, meaty and is about the best oat. 4623—See prices above.

**WISCONSIN PEDIGREE No. 1—Wisconsin Wonder.** This fine white variety originated at the Wisconsin Experimental Station, and is one of the most sought after of all oats. It stands up better than any other oat, on rich river bottom land, where other varieties usually lodge. Its coarse, stiff straw permits it to stand up well on rich manured land. Especially recommended for following cultivated crops. The kernels are white, rather long, with a medium hull. Heavy yielder. Early. 4620—See prices above.

**SALZER'S WHITE KHERSON—(Iowa 103)—**A grand oat which has twice carried off sweepstakes at the International Dry Farming Congress. An early variety; splendid nurse crop; ripens early. Harvesting and late sowing of other crops. Kernels are slender, plump, white, and thin-hulled. Heavy yielder. 4622—See prices above.

**60-DAY, JULY OR KHERSON—**It is a small, yellowish oat with a very thin hull and practically all meat, and with short, stiff straw. Does not lodge easily. Sixty Day Oats are extremely early and are especially fine in a dry season. They usually yield 70 to 80 bushels per acre, at least. It adapts itself readily to different soils. Can be grown with your barley. Mature in about 80 days, rather than 60 as the name would indicate. 4616—See prices above.

**SWEDISH SELECT OR WIS. PEDIGREE No. 5—**A splendid late white oat for upland soils and poor land. The kernel is large and plump. Straw grows tall and rank and the panicles are large and well filled. It is a late maturing variety. Rust resistant and not easily susceptible to smut. Adapted to the lighter soils which are less liable to cause lodging. 4621—See prices above.

## SALZER'S SILVERMINE

This variety is reputed for its heavy yields and is a fine second early white oat, very robust and vigorous and seldom lodges. The heads are borne low on strong, stiff straw which is unusually bright and clean. The kernels are white, plump, heavy and thin hulled. Endures extremes of dry, wet, hot and cold weather. 4615—

Lb., 25c; peck, 88c, postpaid to 4th zone. Not prepaid: Peck, 50c; ½ bu., 70c; bu. (32 lbs.), \$1.20; 2½ bu., \$2.90; 5 bu., \$5.65; 10 bu., \$11.15; 20 bu., \$21.95. Bags free.

## VICLAND OATS

Vicland is an early yellow oat, very high in bushel weight, that has yielded over 85 bushels per acre, very resistant to rust and to smut! On rich soil, the straw reaches a good height but on poor soil the straw is apt to be too short to cut with a binder. Vicland will stand in the shock a long time without maturing, which is most desirable in rainy weather. Seed is available only in three bushel sealed bags. 4607—Certified Vicland Oats: In 3 bushel sealed bags, \$2.90 per bushel, bag extra at 30c; Per bag, \$7.80, not prepaid. Three bags (9 bu.) plants five acres.

## FIELD PEAS — YELLOW CANADA

Plowed under as a fertilizer, they rank next to Red Clover. Can be grown alone for fodder purposes and green manure. For a dairy feed, mix them with oats, rye or barley, and cut when the oats head out. Hay is of finest quality.

4655—Radium Brand: Lb., 35c; peck, \$2.08, postpaid to 4th zone. Not prepaid: Peck, \$1.45; ½ bu., \$2.65; bu. (60 lbs.), \$4.75; 2½ bu., \$11.75; 5 bu., \$23.25. Bags free.

## SALZER'S PENCILARIA

Plant pencilaria 6 inches apart in rows about 3½ feet apart and cultivate. Averages 40 rich, juicy, leafy stalks to the plant, which are covered with seed heads 12 to 24 inches long. Fine for poultry, and ground for cattle, it cannot be beat. Sow when you would Corn. Or it can be mowed 3 to 4 times during the season. It is relished by all kinds of stock. Drill in 5 to 6 lbs., or broadcast 8 lbs. per acre.

4661—Lb., 40c; 2 lbs., 69c; 5 lbs., \$1.58, postpaid to 4th zone. Not prepaid: 15 lbs., \$3.30; 25 lbs., \$4.95; 50 lbs., \$9.65; 100 lbs., \$18.75. Bags free.

## PHALARIS OR REED'S CANARY GRASS

A magnificent grass for wet, low-lying, poorly drained soils—in fact, the only grass we know of for reclaiming such lands. On many farms are to be found low wet situations where neither Red Top, Alsike, nor anything else will grow, and for these situations, Phalaris or Reed Canary Grass is the thing to plant. Phalaris is very hardy and as the seed shatters so easily it spreads rapidly.

The hay is a little coarse, especially if it is left to grow too long, but it is nutritious and easy and all stock like it. The leaves are quite broad and the plant flourishes, often growing 5 to 7 feet high. Underground stems rapidly form a tough sod and hold hay machinery without difficulty. Yields of 4.57 tons of hay per acre from two cuttings, have been reported. Cut the first crop for hay as soon as the heads or panicles appear. Two cuttings can be made and then fall pasture may be had or 3 cuttings may be made.

Broadcast 5 to 6 pounds per acre or drill in ½ in. deep, at the rate of 2 to 3 pounds in 18 in. rows. If the land is well drained so you can prepare a seed bed, do so. If covered with water, wait till the water recedes and then sow. May also be sown on the ground and snow in January, leaving it to settle with the weather. 4511—Radium Brand—Lb., 88c; 3 lbs., \$1.65; 5 lbs., \$2.58, postpaid to 4th zone. Not prepaid: 15 lbs., \$6.45; 25 lbs., \$10.35; 50 lbs., \$20.25; 100 lbs., \$39.50. Bags free.

Your States Pride Oats last year yielded 80 bu. to the acre and weighed 33 lbs. per bushel.—Mrs. Albert E. Harnish, R. D. 1, Caledonia, Illinois.

# SALZER'S BILLION DOLLAR GRASS (Panicum Crusgalli)

**Especially Valuable for Silo and for Feeding Green—A Substitute For Corn Fodder**

**Green Feed on August 1st**

Salzer's Billion Dollar Grass furnishes a heavy amount of desirable green feed during August! Sown about the end of May, the fodder will be ready to cut about August 1st or a little earlier! To cut it before it blossoms and continue to cut for about 12 days or until the stems toughen. By making a second seeding about June 10 and a third about June 25, abundant green feed may be had during all of August and with later seedings, into September!

Salzer's Billion Dollar Grass gives a heavy yield of green fodder, from 12 to 18 tons per acre on naturally moist, retentive land in good condition, but heavier yields of up to 35 tons per acre have been reported. Yields anywhere up to 60 bushels of seed per acre (35 lbs. per bu.), although 90 bushels of seed per acre have been reported, and it yields from 3 to 6 tons of hay per acre.

## A Quick Producer

Salzer's Billion Dollar Grass produces green feed, and plenty of it, in about nine or ten weeks and attains the height of four to seven feet according to the richness of the soil. It is the one grass to sow if you want plenty of green feed during August and September for your cattle, horses, sheep, hogs and poultry. Up to 90 bushels (3,150 lbs.) of seed per acre! Hogs, poultry, geese and turkeys relish the green feed and thrive and fatten if fed the seed during the fall and winter months.

By cutting as soon as the plants come into bloom, a second crop may often be had and the yield of forage materially increased. When grown for seed, it gives only the one crop and sometimes some pasture thereafter.

Salzer's Billion Dollar Grass gives 3 to 6 tons hay per acre but as it is rather coarse and succulent it is difficult to cure for hay and we do not recommend it for that purpose. Since it is difficult to dry, the hay may become musty and so one cannot depend upon a large amount of dry hay. However, if the weather allows several extra hay days to follow one another, it is successfully cured in small cocks as clover is often cured.

Use Salzer's Billion Dollar Grass as silage in place of corn wherever it is not possible or convenient to grow corn. It is a wonderful "catch crop" whenever the corn has been destroyed by hail or otherwise.

## Where It Grows

It grows best on a soil that is rather retentive of moisture and quite rich. It luxuriates on a low, rich, moist situation but it also does well on higher ground. When it is sown on retentive soil, it endures drought fairly well. On the rich soils of the West and Northwest where there is sufficient moisture, or where there is irrigation, it yields heavily and it has given good yields on the alkali soil

so common in parts of the West. In the Mississippi Valley, it yields abundantly.

## It Is Productive

Under average conditions of moisture and fertility of the soil, Salzer's Billion Dollar Grass is one of the most productive of the annual grasses. Think of yields of up to 20 tons of fresh green feed per acre, up to 6 tons of cured hay per acre, or up to 3,000 pounds of seed per acre! Its biggest and its greatest value, however, is in its green fodder and in its silage.

## Feeding Green

Salzer's Billion Dollar Grass cut from day to day and fed green to cows, is much relished and its superiority to well-cured flint corn fodder is very apparent. Cows will eat better of them, always eat. Billion Dollar Grass first, consuming it without waste, while they are apt to leave part of the corn as it approaches maturity. Cows invariably increase in milk when green Billion Dollar Grass is alternated with corn fodder. However, after twelve days or so, the cattle leave some of the stems, and for this reason several seedings of Billion Dollar Grass are desirable in order to produce a constant supply of tender green feed. There is no labor involved in growing it—simply sow it and cut it when it is ready.

Feed continuously and alone, Billion Dollar Grass acts as a laxative and a diuretic, and the ideal feeding is about 10 pounds hay per day plus about 50 pounds green Billion Dollar Grass per day. When animals run in the pasture, a supplementary feeding of green Billion Dollar Grass is beneficial.

We have found it advantageous to sow Peas with Salzer's Billion Dollar Grass, at the rate of 1 lb. bu. Yellow Canadas. Peas with about 10 lbs. Billion Dollar Grass, first deeply harrowing in the Peas and then covering the Billion Dollar Grass with a tooth harrow.

## For Silage

Over 18 tons ensilage per acre! Billion Dollar Grass is not as nutritious as corn silage, yet it makes a very fine silage and makes a fine substitute if the corn crop fails or if corn cannot be grown. For ensilage, cut late bloom, or when the seed is beginning to form. If cut after it has ripened its seed, it will then be too dry and tough. Filling the silage with two parts by weight of Salzer's Billion Dollar Grass and one part of Soy Beans makes a very superior silage.

## What It Is

Panicum Crusgalli is a Japanese Millet and was given the name Barnyard Millet in 1896 by Prof. W. P. Brooks of the Hatch Mass. Station. In 1901 we first offered it to the public and gave it the name Billion Dollar Grass because of its tremendous yield of fodder and seed, and it is probably more widely known to-day under this name than any other. It is not poisonous at any stage of growth and is distinct from Sudan Grass.

## Culture

Salzer's Billion Dollar Grass is a tender annual and should not be sown before corn planting time as it does not stand frost. Sow about 20 pounds per acre broadcast, covering about 3 inch deep. May be sown up to July 1 and even up to the end of July.

**PASTURE**—All rich, luxuriant grasses should be pastured moderately at first. Therefore, you should turn in your hogs, cattle, sheep, and horses the first few times only after they have had a good feed elsewhere and thus become accustomed to it. It is on the same plan as hungry stock turn the first time into a field of rich clover—they might find him. Turn them into Billion Dollar Grass moderately at first and you can soon permanently.

**FOR HAY**—Cut when the plant is in early bloom. Cut with a mower and allow it to lie in the swath for a day; then rake into windrows and when sufficiently cured, put it into cocks for about a week.

**FEEDING GREEN**—Begin to cut before it blossoms and continue until the cattle do not eat all of the stems.

**FOR SEED**—Let Salzer's Billion Dollar Grass get thoroughly ripe and cut and thresh as you would Timothy. The seed is about equal to oats in composition, that is in protein and fat.

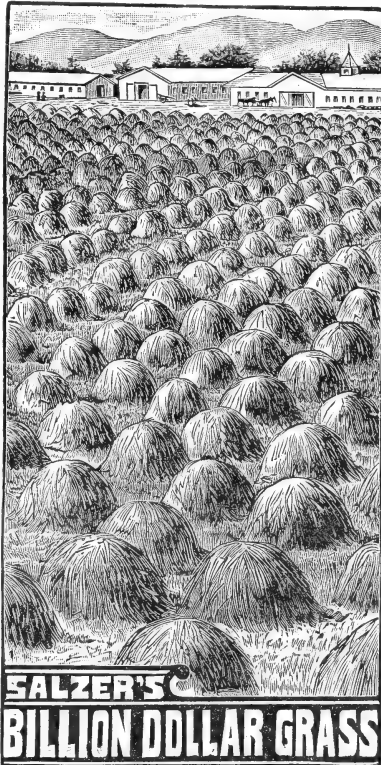

## It Is Ideal

as an annual pasture, as a catch crop, as a substitute for corn, for smothering out weeds, and as a supplement to permanent pastures and meadows and as a readily available crop for use in short rotations.

# SALZER'S EARLY SIX WEEKS POTATOES

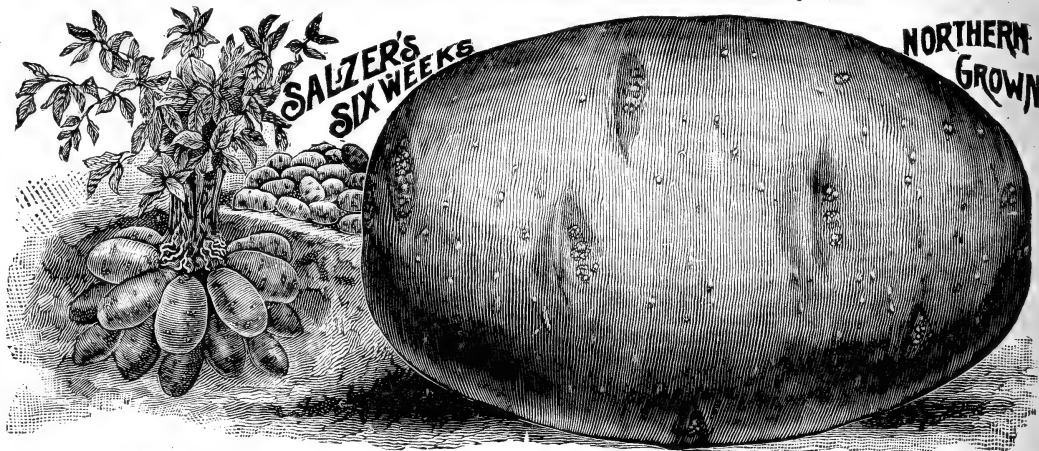

We are nationally known as the largest retail seed potato house in the country, and we probably handle more potatoes than any other company. Our seed is grown in the fertile Eagle Valley and Red River Valley of Northern Minnesota, two districts which have not as yet been surpassed for quality seed. Prices should not be judged by the price of eating potatoes. Our potatoes are grown primarily for seed purposes and all of them are U. S. Gov't. Grade No. 1. We believe you will be well pleased with them. U. S. Grade No. 1 requires that the potatoes be practically free from scab, blight, dry rot and damage caused by disease, and be graded to a minimum size of 1 1/2 inches. 60 lbs. in one bushel.

Salzer's Early Six Weeks stands alone as the great earliest general purpose potato! It is ahead of Salzer's Earliest in quality and yield, although not quite so early, but is 10 days earlier than the famous Early Ohio Potato. There is another great advantage in planting Salzer's

Early Six Weeks Potatoes and that is that it has never failed to produce a good crop of extremely early, very large tubers.

Salzer's Early Six Weeks is fit for market everywhere in just about six weeks. Loss of seedlings or transplanted plants, stunted, one-sided and off color plants in those that survive, dark colored streaks in the stem, yellowing of the upper leaves and death of the lower leaves are characteristics of Aster wilt or Aster stem-rot. The wilt organisms are capable of prolonged existence in one's soil and the only remedy is WILT-RESISTANT SEED.

This seed is practically immune to wilt and stem rot and produces flowers on soil upon which ordinary seed would not possibly grow. In one severe test, plants from this wilt-resistant seed grew splendidly while 93% of ordinary seed succumbed. We offer wilt-resistant seed of the following:

## DAHILIA FLOWERED ZINNIAS

The Dahlia-flowered Zinnias are distinguished by being nearly as deep in the center as they are wide, with smaller individual petals than the ordinary varieties, but many more of them. Their colors are soft and pleasing, being characterized by blended shades and pastel effects which, with the slightly reflexed and closely over-lapping petals, give the whole flower the appearance of a fine satin cushion. The plants are medium tall and vigorous, producing a wealth of immense blooms from July until frost. 2½ to 3 feet.

## SALZER'S CALIFORNIA GIANT DOUBLE ZINNIAS

The petals of Salzer's California Giant Double Zinnias are decidedly imbricated and the flower from bud to bloom assumes a succession of graceful forms. 3 to 4 feet.

The Zinnias are truly giant in size, frequently measuring 6½ to 7 inches in diameter, and are borne on long and strong stems. When cut the graceful flowers last exceptionally long in water, and make a lovely bouquet. Everyone who has seen them has greatly admired this lovely mammoth type of Zinnia, and its lovely range of colors.
